bag and waved Tollason out on the first play.

This sparkling double play ended as good a game as will be seen in the league this year. Both teams were on their toes and fighting every minute. Such games as that, win or lose, will keep the fans jamming the ball park every Sunday.

There were close to a thousand people at the game, the receipts being \$418. The steamer Telegraph brought a hundred or more up from Bandon.

Speaking of this game the Bandon World yesterday takes the defeat of its home team in good part and says: "Bandon lost its first game in the Coos county league Sunday when the local boys met defeat at Coquille by a score of 4 to 2. It was a splendid game nevertheless, and the fans were well satisfied with the exhibition. Only two errors were made on each side.

Marshfield won the opener on the Bay-Sunday from North Bend, shutting them out 6 to 0. The North Bend pitchers bootied the game away, their pitcher, Maddock, really pitching a better game than the ex-Coast Leaguer Coleman.

Sunday, June 10, Coquille goes over to the Bay to play Marshfield, while North Bend is at Bandon. The game at the Bay will be on the North Bend grounds, and most of Coquille is figuring on going over there to see the scrap for league leadership.

To Visit in Eastern Oregon

Mrs. L. Myrberg started yesterday for a trip to Portland and Bend. At the latter place she will visit two brothers, Harry and Guy Livingstone, who have a big timber trucking contract there. On her return about a month later she will visit two other brothers, Will and Alfred Livingstone at Woodburn and attend the Church of God camp meeting there, which always attracts a large crowd of attendants. The services are held now in a large tabernacle in the grove belonging to that denomination, just north of the city on the S. P. railroad. This is an annual event.

ROAD BUILDING

LENGTH OF WORKING SEASON

Most Important Factor in Road Construction—There is Considerable Variation.

(Prepared by the United States Department of Agriculture.)

The length of the working season is a most important element in road construction and one in which there is considerable variation, according to the bureau of public roads of the United States Department of Agriculture, which has collected data from all of the states.

Deducting Sundays only there are 313 working days in the year, and Alabama, Mississippi and New Mexico report that grading is possible on 300 of them. Neighboring states report as

Building on One Side of Road While Other is Open to Traffic.

follows: Florida, 295; Louisiana, 290, and Texas, 275. Contrasted with these are Maine, with 110; New York, 190; Wisconsin, 158, and western Oregon, 100. In 14 states grading will probably be impractical after the middle of November, and in some of them at an earlier date.

Gravel surfacing can be placed in most of the states on from 120 to 200 working days, although 10 of them report a greater number.

In 29 states concrete surfacing can be placed on from 100 to 150 days, and in 16 states on from 150 to 200 days. In 28 states the season is generally over by November 1.

INSURE FERTILITY OF EGGS

To Produce Hatchable Eggs, Breeding Stock Should Be Well Fed—Exercise is Essential.

Early hatches are desirable when one has facilities for caring for the little ones, and when proper fertility can be secured in the early eggs. Naturally, eggs will hatch better in the middle or late spring, but with proper care the fertility can be insured earlier.

Breeding stock that is kept in the open air will produce hatchable eggs earlier than those that are tightly housed. In fact, such results can be obtained from stock housed in open front or scratching shed houses.

To produce hatchable eggs, breeding stock should be fed liberally but forced to exercise freely. Some meat and bone are necessary in addition to grain feeds scattered in the litter. It is believed by some that mash fed hens do not produce good hatching eggs, but there seems to be no foundation for this opinion, as experiments have proven that there is no difference between such eggs and those produced by hens fed entirely on whole grain and meat.

DRUGGISTS STATIONERS

Bert Dean Returns to Coquille

Bert Dean returned Monday morning from Watsonville, Calif., where he spent the past winter. His family did not come up with him, but he expects to spend the summer here. He tells local inquirers that that section is the first place he ever found that he could live without work, but later goes on to tell enough to indicate that he did labor, especially during the fruit season.
