### Two Thieves Paroled

Geo. Martin, who played here for the dance at Graham's Hall last Saturday night, stopped at the noodle joint in Marshfield for a bite to eat before going home and when he came out found that some thief had removed his two victrolas and console table. The waitress had seen a couple of boys fooling around the car and gave their description to Chief Carter, who recognized it as fitting a couple of the Bay's bad actors. He accordingly went after Ross Billings and Lester Adams and soon had recovered the instruments, which Mr. Martin valued at \$500.

Being under age they were brought before Judge Mast in juvenile court, who sentenced them to the reform school and then paroled them in the custody of their parents, with the warning that the first time they got into trouble he would revoke the parole.

### An Ancient Record

A. T. Boldon showed us last Monday the fly leaf of the family bible containing the record of his birth, which he was sending in to show that he was 45 years of age when he enlisted in the U. S. service at the time of the Spanish-American war, when he went to the Philippines; and that he is now about 70 and will be eligible for a pension of \$10 a month for his services at that time. The records in that bible run back to 1822—or over 100 years.

### To Have 24 Hour Service

J. D. Graham & Son, who purchased the machine shop equipment of Ray Long, when he took charge of the Coast Auto Lines garage here, will continue to operate the shop and expect to have a competent man here from the north soon after the first of the year to take charge of it. They are also planning on giving a 24-hour repair service and will have a wrecking car always available, which can handle the largest auto.

### Good New Year's Dance

There was a large crowd in attendance at the New Year's Eve dance at Graham's Hall Wednesday evening, which saw the old year out with considerable merriment and greeted the new with good cheer. It was another of those really enjoyable dances for which Coquille's dance hall has become famous.

Mr. and Mrs. Birch returned home last night and plan to make their home in Millington.—News.

### Christmas Cantata Given

On Sunday evening, December 29, the choir of the Southern Methodist Church presented the Cantata, "The Star of the East," to a large and appreciative audience. The cantata is beautiful and impressive throughout and was splendidly rendered under the leadership of Mr. Frank Leslie. The evening's service represented a real addition to the activities and inspiration of the Christmas week.

### Star a Good Performer

Geo. Burr has been making a number of street tests with the Star automobile lately, for which car the White-Burr Motor Co. are agents. One of his demonstrations was throwing the gear into reverse after attaining a twenty mile speed ahead, and he successfully accomplished this feat, which is advertised by the Star company.

### English Law a Paradox

One may be fined for stopping a dog fight or not stopping a dog fight. But the post office can record something even better, the Manchester Guardian relates. At a seaside town a man walked into a post office followed by a huge dog. A woman was already at the public counter, and she also had a dog. The two dogs began to fight. The man did not attempt to interfere. He appealed to the girl assistant, who was on the safe side of the counter, to come over and part the combatants. She declined, very naturally. Eventually the turmoil ceased, and then the dog owner lodged a complaint with the postmaster that his subordinate had permitted confusion in the office and upset the public.

### Curiosities of Smell

No substance that refuses to dissolve in water has an odor. It is the actual substance itself, floating in the air, that appeals to the nose and not simply a vibration of the air, as in the case of light and sound, says the Cleveland Plain Dealer. The damper a thing is the more powerful odor it gives off. A pleasant proof of the fact can be had by walking in a garden after rain. There is no end to the curiosities of smell. It is, for example, the vapor of a liquid that smells and not the liquid in the mass itself. If eau de cologne be poured into the nostril the nose refuses to recognize any odor there at all.

### Men and Instincts

Writers of the last century regarded instinct as almost non-existent in man, whereas reason was denied to animals. Later scientists held differently, among them having been Prof. William James, who maintained that man has as many instincts as animals. He further maintained that instinct played a leading part in the determination of all human conduct. McDougall, the eminent philosopher, goes still further and says that man's organisms would become incapable of activity of any kind if instinctive dispositions with their powerful impulses were taken away.
