Graham's Garage

Hups and Chevrolets

The district representative of such nationally known automobiles as the Hupmobile and Chevrolet would be almost certain to be a community leader in any city. Coquille is no exception to the generalization. In fact, the rule applies here with greater force than it would in most places.

In taking the agency in such a growing motor center as the Coquille district for these leading automobiles, the Graham Garage has taken a big job upon itself, but not too big, as the records made by the above mentioned automobiles will amply prove. The sales of these cars are generally growing as each year goes by, here as elsewhere. The Coquille Valley, due largely to the energy and capacity of the management of the Graham Garage, helps the manufacturer to build great cars, which would be impossible without patronage.

It would be impossible in such an article as this to adequately describe the merits of the Hupmobile but we cannot refrain from making some comment on it. The Hupmobile in its price class is the outstanding automobile. In fact, it is claimed to be the superior value of this class.

The Chevrolet at its price is known to those most familiar with it as the greatest automobile value obtainable at its cost. It is referred to by owners as the equal of many cars of much higher cost.

Mr. Graham is alive to the importance of these machines and appreciates full well the eminently big values that he is able to offer his customers in these two automobiles.

Every sale made by the Graham Garage carries with it a class of owner service that is in keeping with the superior machines sold by it, a service that means every day satisfactory use at the lowest comparative cost. The garage and repair department of the business is under the active management of W. R. Bever, who is an experienced man along these lines.

The Graham Garage was recently expanded by the purchase of the Ray Long machine shop and they are now giving a twenty-four hour repair service. Included in the up-to-date

Thrift

is considered so important that a week has been especially designated in the calendar for the exercise of that quality. That period has just passed and we have had a substantial increase in Savings Deposits. Many Coquille children are growing up with the saving idea and they are not going to be "tight-wads" either. They are saving a goodly portion of the nickels and dimes that come into their hands, of course, but are enjoying also many of the things for which children like to spend money. Remember, we pay 3 per cent compounded semi-annually.

MOUNTAIN STATES POWER COMPANY

Creamery Made

521,000 lbs. Butter

J. H. McCloskey recently announced that the Coquille Valley Creamery would this spring resume the manufacture of cheese, something it has not done for the past seven or eight years.

Cheese is becoming one of the leading dairy products of Coos county. Last year the Melowest brand won over all other entries at both the State Fair and at the Land Products Show in Portland and the publicity resulting has accomplished a great deal in directing public attention to the product of this section.

Mr. McCloskey has been manufacturing cheese at his Lee plant for several years, and last year averaged payments to the dairymen of 46 cents a pound for milk. With a better price for cheese this year he is hoping to equal if not exceed that figure for the raw product at the Coquille factory this year.

It is estimated that there will be about 10,000 pounds of milk received daily during the coming season, which will mean a daily output of 1,000 pounds of cheese. This, however, will not be the capacity of the plant, and the more dairy land there is cleared and cows located thereon, the greater the output and the more returns to the dairymen.

In 1924 Mr. McCloskey made 363,126 pounds of butter, for which he received \$141,280 and paid the dairymen for their cream an average of 44.3 cents a pound, which he is convinced was the highest average paid by any creamery in the state. The price varied from 38 to 55 cents a pound.

There were 256 dairymen who shipped cream to the local plant last year. In 1925, when he was taking the cream supply of the Nestle's Food Co. plant, he exceeded the 1924 total production, making 521,000 pounds of butter. In 1924 he handled the Nestle's cream only in the winter months.

The increase in the plant's activities, by the manufacture of cheese, will mean the addition of three men to the payroll there this year, just doubling the number now required for operating it.

He expects to start the cheese department about March 1, and will put the finished product out under a "Coquille Valley" brand.

To get the highest market price he plans to put the cheese out in small individual containers. His market is mostly in San Francisco.

One Bank's Early History

The Farmers & Merchants Bank, which was first incorporated in 1907, just before the panic struck that year, was not opened for business until a year or so later.

The first incorporators were J. J. Stanley, W. T. Kerr, J. M. Nigh, J. E. Paulson, Geo. A. Robinson, J. S. Miller, Fred Belloni. They built the foundation walls that fall and then stopped.

When the reorganization was effected the stockholders were R. H. Mast, J. J. Lamb, Geo. A. Robinson, R. S. Knowlton, J. S. Miller, and others. They opened for business in

New Winter

Your motor never snapped over quicker in summer than it does now on the new winter Red Crown. You never got faster, smoother acceleration in traffic, nor better mileage. The new winter Red Crown is a buy, snappy winter starting and power in heating measure.
