In order to understand what it There has developed in the past few ners into short pieces which were years in this country a remarkable used in place of seed. The popuancient game of golf with its ever gardless of cost furnishes the stim-States. The number is increasing luding buildings would be above a oillion dollars. More than twenty-five million dollars is spent annually on the upkeep of these courses. A large tem in the maintenance of many golf courses is the seed bill. On courses where the right grasses have peen used this items is reduced to a

Interest in fine turf is not confined to golf courses. The demand is becoming urgent from park superintendents and those interested in other athletic fields, such as tennis courts, polo, football and baseball better suited to their needs that the sorts commonly used. Home of sare also looking for a satistic por lawn gress.

Prior to 1914 the best of t ti fine

turf grass seed came from Untral Europe, mainly from southern Germany. The blockade established by the Allies in the World War cut off entirely this sources of supply. I was at that time employed by the culture and was given the task of The ranch owner then has the straw turf grass seed. My immediate su- for feeding. It makes the hay perior , Dr. C. V. Piper, and Dr. R. crop a cash crop as well as allowing A. Oakley, of the same organization, for the usual stocking of the ranch lished a testing garden for grasses at the Arlington Farm at Washington. For several summers I worked had any value before the business ing to rejuvenate the defunct Rhode Island bent seed business in New learned that creeping bent was the soil of this valley.

The introduction of a new crop or best turf grass in use. There was an increase in value of an old one no seed of this to be had on the maroften materially changes the agricul- ket. The German bent seed someture of a locality. Creeping bent times carried a mere trace of this grass known locally under the eron- excellent turf grass and wherever handling groceries, vegetables and clean, it being Mr. Nosler's policy to eous name of Bermuda grass can not it had been used in years past patches be called a new introduction. In of thick sod free from weeds could fact it is a native of this country. The be found. We made a great many harvesting of the seed of this grass, selections of the best of these and however, is such a young industry as began growing them in cultivated to amount to the same importance as rows. A creeping bent is distinwould the introduction of a crop more guished by having long stems which profitable than those hitherto grown grow out flat on the ground and take here. No claim is made that this root wherever the joints come in new business is going to work an contact with moist soil. Some of agricultural revolution around Co- our selections would make a spread of two to three feet on each side of

After much experimenting we oris all about, one must know the use ginated a method of planting these which is to be made of the seed. grasses by simply chopping the runnterest in fine turf. The rapid larity among golfers of vegetative strides in popularity made by the planting, as it is called, has been sensational. But I never gave up my increasing number of devotees who search for an American source of insist on having the best of turf re- creeping bent seed. When I learned that there were large areas of seaulus. There are now some four side strains of creeping bent growing housand golf courses in the United in Coos county, Oregon, the news seemed almost too good to be true apidly. A conservative estimate of A visit here last July convinced me the value of golf course property in- that I had not been misinformed and I bought all the grass I could find. This is now threshed and I have a nice lot of seed. With the best cleaning machinery to be had, we are cleaning this seed to a degree of

The future of this industry depends now on the success I have in selling the product. My own confidence is shown in the fact that I have already contracted for about twice as much grass this coming season as we threshed last year. I am also building a warehouse in Coquille fields and bowling greens, for a turf for use in cleaning and storing the seed. An advertising campaign is underway to make Cocoos bent, the trade name given to this seed, known to those interested in better turf. Orders for seed are already coming in. I feel sure that before next sum-
