**Raising Reedsport**

The writer remembers very well when the low-swampy land about old Fort Dearborn, where Chicago was built, was raised several feet to get it out of the mud. Reedsport is undergoing a similar transformation according to a press dispatch from their last Tuesday:

Plans for raising the level of the city of Reedsport, as discussed at a meeting of the city council Monday night with City Engineer D. E. Buckingham call for expenditure of approximately \$75,000 and moving about 450,000 cubic yards of material. The city level would be raised about five and one half feet. Material would be sand and gravel secured from the Schofield and Umpqua rivers and about 80 acres will be covered.

**Income Thus Exceeds Outgo**

Every family must regulate its standard of living in the correct proportion to its income, and should do so on the basis that that income should exceed the outgo.

You can do this if you use a First National Checking Account to keep an accurate record of every dollar spent. Try this way and you will see how "leaks" not now known are discovered and can be stopped.
