Germany is paying her debt to her own citizens on a 5 per cent basis. The outsider, who speculated in German bonds, notes or what ever other paper stuff he thought he could make a speck on, don't even get the 5 per cent. I am glad those fellows all get stepped on, and that the Germans have learned that when they put up money to back robbers to rob other people they have to pay through the nose. The Germans have learned that they robbed themselves not only of money, but of the decent respect of mankind. R. A. Easton.
