### Buell Divorce Denied

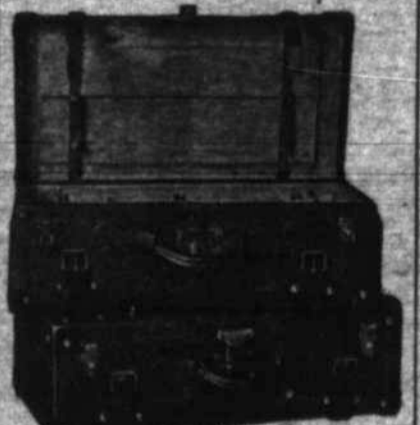

A contested divorce case, which lasted more than two days was concluded here Tuesday evening when Judge Kendall dismissed the case. It was that of Carrie Buell, vs. Joseph Buell. The judge held there was not sufficient evidence introduced to justify granting a decree. A. J. Sherwood appeared for the defendant, and Geo. Topping, for the plaintiff. They were a Bandon couple who married in 1914.

Last Saturday the court granted a divorce to Augusta West, separating her from A. V. West. Mr. West was given the custody of their three girls, while the boy was awarded to the mother.

Two default divorces were granted by the judge last Tuesday to the plaintiffs in the following cases: Adeline Stenson vs. Robert K. Stenson.

Orphis Flynn vs. Walter S. Flynn.

### Protect Forests on the 4th

Every patriotic citizen should make fire protection an important part of his Fourth of July celebration according to a statement just issued by C. M. Granger, District Forester, Portland, Oregon.

"The forests and forest industries are an important factor in our National greatness," said Mr. Granger, "and it is the duty of every citizen to see that they are protected from fire."

He pointed out that every year forest fires are started during the Fourth of July by picnickers and campers who take fireworks into the woods. Discharge of fireworks in the National Forests is prohibited under a new Federal regulation, and is punishable by fine and imprisonment. The regulation will be strictly enforced, Mr. Granger said, adding: "We want the forest visitors to enjoy their holiday in the woods; but independence day celebrates the founding of our country's greatness, and it is a poor sort of patriot who celebrates by destroying his country's resources."

"We, therefore, ask our forest visitors to leave their fireworks at home, so the forests may be protected from fires needlessly started in the name of patriotism."

### Coquille Defeats North Bend

The North Bend, baseball team made the home team go the limit to win at Athletic Park last Sunday, as the visitors were in the lead practically all the way. When Coquille went to bat in the last half of the ninth, the visitors were leading by two runs and it was Carl Gilbert's bat, with two men on base, which scored the tying and winning runs. The local club is a good hitting team this year and they are dangerous at all times. Zoel, Gilbert and Fortier were in the points, which Sutherland and Diacol performed for the visitors.

Tomorrow and Sunday Coquille and Reedsport will clash at the Bandon ball park as one of the features of the Fourth of July celebration there.

If you want to subscribe for the daily and Sunday Oregonian you can still save half the cost of the Sentinel subscription by taking the two papers together.

Calling cards, 109 for \$1.50.

Weeds Rob Gardens of Food and Plants Should Be Controlled for Good Crop.

Weeds are persevering thieves. They are at work continuously and rob the garden of sunlight, plant food and moisture which are most essential to the growth of cultivated vegetables. They should be controlled to have a successful garden.

"Successful, tender vegetables can be grown only in the presence of the maximum amount of moisture, light and plant food," says Glenn O. Standell, extension horticulturist for the North Carolina State college extension service. "For the home gardener to get the most profitable returns from his efforts, therefore, he must make these conditions favorable and he certainly should not allow weeds to take charge."

"Many gardeners allow their enthusiasm for the plot to lag when the weather gets hot and the weeds begin to grow. It is possible to have plenty of vegetables in mid-summer and late in the season but the weeds must be controlled. This can be done if the garden is laid out in long rows with plenty of space between each row so that horse cultivation may be given. If the area is too small for regular plowing, use the wheel hoe and then a large amount of hand hoeing may be eliminated."

"The destruction of weeds is the most important object of cultivation—more important than maintaining a mulch. This has been proven by several experiments, notably one with corn which showed, as a result of sixteen tests, that killing weeds pro-

duced a gain of 17.1 bushels per acre. However, vegetable crops are benefited by frequent, shallow cultivation and when this is done so as to keep the weeds in check the garden will be most profitable. It costs money to neglect the home garden."

### Average Cost of Pig at Weaning Time Will Vary

Records kept by Pennsylvania farmers show that during the past three years the average cost of a pig at weaning time has varied from \$4.06 to \$5.75. Twelve Lancaster county (Pennsylvania) farmers kept cost of production records for 43 sows in cooperation with the extension department of the Pennsylvania State college. The sows averaged slightly more than nine pigs each in farrowing and raised slightly under seven each. Costs on the fall pigs were lighter than on spring-farrowed pigs. For the three seasons of 1921, 1922 and 1923, the costs on fall pigs were \$4.43, \$4.06 and \$4.57. For the spring seasons of 1922 and 1923 the costs were \$5.06 and \$5.75 per pig.

As a result of the study the Pennsylvania extension department issues the following summary of the cost of caring for a brood sow raising 7.5 pigs to weaning age:

Feeding	\$15.66
Labor (18.12 hours)	4.55
Bedding	.42
Breeding	3.74
Pasture	2.25
Cash expense	.75
Equipment	.40
Interest	2.28
Total	\$24.15
Credits—measure	1.90
Net cost	\$22.15
