A Good Oil-Cookstove —a "City-Easy" Solution!

YOU realize how "city easy" your kitchen-work can be when you use a good oil cookstove. No messy fires to tend—simple, noiseless, safe!

And the fuel problem—presenting the carrying of wood, coal and ashes—is solved—just be sure you ask for "Pearl Oil" by name. That's the high-grade kerosene the Standard Oil Company refines and re-refines so it burns clean, no smoke, no odor—nothing but intense flame that's all heat!

Make your oil-cookstove as efficient and economical as it should be—use Pearl Oil. Order by the name that's copyrighted for your protection—always say—"PEARL OIL".

What \$2.25 Will Do
For \$2.25 you can have the weekly visits of the Coquille Sentinel and the Oregon Farmer—52 of each—for a year.

Have your Sunday dinner at the new Coquille Hotel. Per plate \$1.25.

If you want to subscribe for a Portland daily the clubbing combination we offer with the Sentinel will save you money.

The Sentinel and the Oregon Farmer both for \$2.25 a year.

Choice of Tractor Depends on Needs

Several Suggestions Made
to Use as a Guide.

Before buying a tractor most farmers want to know what kind will meet the need of their farms. Because of frequent requests from farmers for help in this matter the engineering staff at the New Jersey State College of Agriculture, New Brunswick, has drawn up a group of suggestions which may be used as a guide to prospective buyers.

1. Choose from the ranks of those which have been tried by years of use, from the manufacturer who has a local representative with a stock of repair parts near at hand.
2. A reasonable amount of service should go with a machine of this type. See if your agent is in the habit of following up his sales to see that he has satisfied customers.
3. A belt pulley controlled by a friction clutch is usually desired. Study the size and location of this pulley.
4. A mechanical governor is very desirable for belt work.
5. At the present price of gasoline it is economical to have a tractor that will operate successfully on kerosene at any load.
6. An air cleaner is essential to long life of the engine if used in dusty fields.
7. A magneto with an impulse starter provides as nearly as possible sure ignition and ease and safety in cranking.
8. It is very important to see that the tractor hitch and implement hitch are suited to each other in height and lateral adjustment.
9. Most working parts should be enclosed, and run in oil.
10. A tractor pulling a two-bottom plow would suit most New Jersey farms on which a tractor can be profitably used. Some might need a three-bottom outfit. Only a few would require a larger one.

Send the Sentinel to eastern friends.

M. E. Church

All services as usual Sunday. Prayer meeting Wednesday 7:30 p. m. You are welcome.

Morning sermon: "Trial in the Furnace of God's Choosing." First Peter 1:7.

Evening sermon: "The Word of Redemptive Power." First John 2: 7-8

The tent for the tent meeting will be pitched just across the street from the Methodist church. This is a splendid location, central and convenient, concrete streets and walks and plenty of room for parking cars. The meeting will open July 19th at 11 o'clock. Instrumental and vocal music will begin in the tent every evening at 7:30. If you miss any one of these services it will be a distinctive loss to you. Let us pray that the Holy Spirit will be present in mighty power. This town is in deep need of an old-fashioned revival of vital religion. This is the opportunity. All people are cordially invited to each service.

J. S. Fenix, pastor.

M. E. Church, South

Sunday School at 10 a. m. Morning services will be conducted at 11 o'clock by Rev. F. E. Finley. There will be no evening services.

Baptist Church

Services held in the Presbyterian church.

Sunday school, 10 a. m. Preaching services at 11 a. m. also at 7:45 p. m.

Young People's meeting at 6:45 p. m.

Prayer meeting Thursday evening at 7:30 p. m.

Rev. Mr. Jennings of Bandon will fill the pulpit Sunday, both morning and evening.

Everyone cordially invited to all services.

"Flushing" Recommended for the Breeding Ewes

Preparation for breeding is the beginning of the direct work for the harvest of lambs hoped for the next spring. The period of gestation in sheep is 147 to 150 days. The mating, therefore, should begin practically five months before the first lambs are wanted. The ewes should be gaining in condition at the time of mating. Such a condition will cause more of the ewes to come in heat quickly and to settle at the first mating, as well as a larger number of twin lambs. Changing the ewes to especially good pasture or giving a little extra feed beginning ten days before the breeding season, will serve to bring about this desired condition. This extra feeding whether from extra pasture or additional feed given, is called "flushing." It has been recommended and followed by successful shepherds for generations and carefully controlled experiments have proved that good results do follow the practice. Trim off the excess wool around dock of all ewes. Neglecting to do this is often the cause of many ewes failing to get with lamb.

Rape on Sour Soils

When land is too sour to grow clover or alfalfa, one of the best forage crops for hogs that can be grown is rape. While rape will grow on poor sour soils, it will not grow as much forage as it will on good sweet rich land; but it will most likely pay to grow some of it for hogs. It would probably make more growth if you would plow the land first, and then work it down well with a disk before sowing the rape.
