

PLANNING FOR INCREASED DAIRY PRODUCTION

Analysis of dairying in Coos County and agreement upon ways and means of increasing the profitability of this industry...

While Coos county is known throughout the country as a dairy county it is thought that this reputation can be greatly expanded by an improved quality of dairy cattle...

Cost production records collected by the state college extension service in many parts of the state indicate that a cow must produce in the neighborhood of 240 lbs. of butter fat...

It was disclosed at the meeting that the dairy industry in the county represents an investment in land, building and livestock of approximately \$8,000,000.00.

Other committees which will plan work similar to that of the dairy committee, include groups on livestock, poultry, general farm crops, horticulture and vegetable crops.

Don't worry about your battery when you can take it to an expert at the Coquille Service Station and have it inspected.
