

## MINOR MENTION.

### Telling About People and Events in the City and County

Miss Maxine Paulson came in yesterday morning from Eugene to spend the week end at home.

Marcelling done at Tourist Hotel, or phone 88-L for appointments. Work guaranteed. 14:2

Mrs. Emma J. Bigelow left by this morning's train for a visit at her former home in Hillsboro.

The guarantors of the Chautauqua are to have a meeting soon and the chair plan will be taken up then.

Order your Home Cooked Foods, the previous day, at the Home Bakery, next door to 20th Century. 11:1f

The Rev. A. W. Bell expects to hold services in St. John's Church, Bangon, on Ascension Day, May 13th, at 10 a. m.

Any broken lens duplicated at once. Have a perfect lens grinding plant. See BIRCH and See Better. Optometrist, Marshfield.

Rev. N. D. Wood of Redwood, Ore., has come to supply the pulpit at the Methodist Church South, which was vacated by Rev. M. F. Hill.

Eyes examined—Glasses fitted—Work guaranteed—Dr. T. DeLaRue—200-201 Irving Block—Marshfield, Ore. Over Hub Store.

Mrs. G. N. Goodrich received a telegram Tuesday from her daughter, Mrs. Walter Crook, announcing the arrival of a baby girl weighing 7 1-4 pounds.

Geo. W. Zerr was a caller Tuesday morning. He is still kept very busy repairing jail doors and locks and providing for the safe keeping of our jail population.

Here in Coos county there have been localities where blackberries ripened all winter; but we still are anticipating an abundance of this fruit the coming summer.

On a competitive bid the Sentinel has just been awarded the contract for printing a batch of 50,000 telegram blanks for the Coos and Curry Telephone Company.

Sunday dinner at the Coquille Hotel means a day of rest for the housewife; no worry, no drudgery. Service is unexcelled.

The Missionary Society of the Church of Christ will meet with Mrs. Dewey Brown, first house west of the Bledsoe House, Tuesday, May 11, at 2 o'clock. Visitors welcome.

L. L. Bonney, a pharmacist from Eugene, came in last Friday to take a position with Fuhrman's Pharmacy. He was a classmate at O. A. C., with Ben Wood, of the same store.

Mrs. Grace McCreight, who came here a few weeks ago from Reno, Nevada, to visit Mrs. Wm. Fortier, elsewhere advertises that she will do marcelling at the Tourist Hotel.

Herbert Lukens and wife arrived here Wednesday from San Francisco and intend to remain in Coos county. "Hub" has accepted a position with the Stout Lumber Co., at North Bend.

Mrs. Judith Collier, mother of Mrs. E. A. Wimer, who returned from a California visit last week, felt perfectly at home down there with all the rain they have been having the past winter.

H. E. Hess left last Saturday for Eureka, Calif., and returned Wednesday evening accompanied by Mrs. Hess and the children. The latter had been visiting at her old home for the past two weeks.

Mr. and Mrs. S. M. Noeler and Geo. T. Moulton intend leaving Sunday for Portland. The latter has been quite sick for the past seven weeks with heart and nervous troubles and he expects to remain in Portland for treatment.

Don't worry about your battery when you can take it to an expert at the Coquille Service Station and have it inspected.

Merle Landreth, grandson of Mr. and Mrs. W. W. Gage, left yesterday morning for Roseburg after a two days' visit here. His home is in California but he is working near the Douglas county seat for a few months.

W. C. Rose, janitor at the court house, has that block of ground looking better than it ever has in the past. Especially do the people here appreciate not having a woodyard made out of the entire northeast corner of the block.

HEADACHES, most of which are caused by eye-strain, are relieved at once when you see BIRCH and See Better. Optometrist, Marshfield, Ore.

Geo. W. Zerr came in last Saturday from Portland and went down to Gold Beach to consult with the county court regarding some improvements Carry county is going to make in its jail facilities. He left for home again Tuesday noon.

If you want to subscribe for the daily and Sunday Oregonian you can still save half the cost of the Sentinel subscription by taking the two papers together.

Mr. and Mrs. F. G. Leslie and Mrs. Lyman Carrier drove to Portland last Friday and were accompanied on their return by Mrs. Leon Pack, a sister-in-law of Mrs. Carrier. Mrs. Pack will visit here until the Carriers go east sometime this summer. Mr. Pack is connected with the steel industry in Pittsburg, Penn.

### Seasons Are Reversed

This year we had May weather in March and with the rainstorm that has been prevailing here ever since Monday morning—practically all the week so far—May has been furnishing the belated March weather due a couple of months ago.

The farmers are all glad, however, to get plenty of those delayed spring rains at last, and are congratulating themselves that a great many small potatoes have been spoiled by being made big ones. And this valley is so much of a farming country that we are all pleased to see plenty of rain in time and are anticipating fine crops of all sorts this year.

### New S. P. Agent

The new Southern Pacific agent at the Coquille office is Frank A. Pook, who is gratified to find his hands full of business here. He comes from the main line in the Willamette valley, where he was a near neighbor of the Sentinel folks while they were publishing the Woodburn Independent, being stationed at Hubbard just north of there. We believe he is going to fill his new position well and prove a popular representative of the company.

### May Disappointing Here

May, which used to be an almost ideal summer month in Kansas, really the finest in the year, has usually proved a disappointment to us here in the Coquille valley; but we are too glad to see the fine spring rains that have stopped the forest fire menace and have allowed crops to start in the valley to express anything but gratification for the blessings we are receiving at this time.

### Square Deal at Graham's Hall

Another Bug Dance at Graham's Hall Saturday evening—one of those bugs which has four wheels and is operated by gas. Manager Graham will be glad to tell you all about this bug—and how it may be obtained. Music by the popular Blue Moon orchestra. Best dance floor in Coos county, Graham's Hall, Coquille, where you are given square treatment.

### Legion to Give Minstrel Show

Coquille Post No. 36, American Legion is planning to stage a minstrel show in the Community Building in about three weeks. The date has not been definitely set. About 25 will take part in the show, which will consist of black face comedians, vaudeville, bathing beauty contest, etc. The boys are planning to spring something original.

### V. F. W. Meet Here May 13

Coquille Valley Post 1412, Veterans of Foreign Wars, will hold a joint meeting and initiation in their hall rooms, I. O. O. F. hall, Coquille, Thursday, May 13th, at 8 p. m. All ex-service men, their wives, mothers and sisters are invited to be there. There will be cats.

### For County Commissioner

I wish to announce myself as a candidate for County Commissioner of Coos County on the Republican ticket in the May Primaries, May 21, 1926. E. H. Harnden.

### NOTICE

The W. C. T. U. will meet at the Church of Christ May 14th. There will be a special Mother's Day program, and refreshments will be served. Also a silver offerings will be taken. Every one is invited to be present, especially the mothers. All are welcome.—Press Correspondent.

The lady of the house is entitled to one day of rest a week. If you take your Sunday dinner at the Hotel Coquille she is sure to enjoy the day.

No more cranking your car when you have your battery repaired at Coquille Service Station. All work guaranteed.

Why not eat Sunday's dinner at the Hotel Coquille? You'll enjoy it, as well as a day of rest.

### A MOST SUCCESSFUL MERCHANDISE SHOOT

The merchandise shoot held by the Coquille Rod & Gun Club at its trap grounds across the river last Sunday was the largest shoot ever held there, 41 shooters being present beside a large number of non-participating sportsmen. There were 2476 targets dropped during the shoot which required several hours to finish.

Below is a list of the prize winners, the prize each won and the name of the donating business man:

- Dr. S. C. Endicott, high gun—Radio by L. L. Thomas.
- L. L. Thomas, long run—Shot gun by Coquille Hardware Co.
- Arthur Ellingson, low score—can fish eggs by Pete Miller.
- Dr. R. V. Leep, second high gun—Electric stand lamp by Gould & Gould.
- Harold Gould, youngest shooter—French cap by Hub Store.
- Alton Grimes—Set of silver cups by Iris Elrod.
- Hugh Harlocker—Box of cigars by Hudson's Drug Store.
- M. J. Hartson—fishing knife by C. J. Furman.
- Dan Brown—silk socks by Fred Wimer.
- C. A. Baer—silk socks by Z. C. Strang.
- A. J. Sherwood—chicken dinner by Lefe Compton.
- F. C. Hudson—hair cut, Ralph Nosler.
- Edith Miller—Battle Fitch Shampoo, Curtis' Townsend.
- C. D. Ray—assortment of groceries by Dunham's.
- J. W. Miller—box of candy by Thos. Michaelson.
- Earl Graham—can of tobacco by S. M. Nosler.
- F. C. McNelly—can coffee, Busy Corner.
- A. M. Fish—5 gallons of gas, Coquille Service Station.
- Paul McCarthy—2 quart cylinder oil, Taylor & Ditto.
- A. W. Chapin—roll of butter, Geo. Johnson.
- J. L. Stevens—quart of ice cream, Geo. Johnson.
- Pete Miller—\$2.00 worth of dance tickets, Earl Graham.
- Geo. Lorenz—pail of lard, J. L. Stevens.
- Penny Sturdivant—can of coffee, 20th Century Store.
- Ed Lorenz—pail of lard, O. T. Nelson.
- Fred Smith—can of furniture polish, M. J. Hartson.

### Rations for Brood Sows

Satisfactory rations for brood sows can be made up from feeds grown on the farm, according to Prof. R. B. Hinman of the New York State College of Agriculture at Ithaca. Corn, barley, oats, boiled cull potatoes and the like can be made the basis of the energy and heat-forming portions of the feed.

Growth-producing foods can be provided in meat-meal, tankage, fish meal, oil meal, alfalfa hay, and good kitchen waste. These will also care for a part or all of the mineral requirements, unless the ration is known to be low in needed minerals.

For ordinary purposes, however, Professor Hinman recommends the following: A hundred pounds of hominy, cornmeal, or ground barley; a hundred pounds each of ground oats and wheat bran; 30 pounds of oil meal, fish meal, or tankage; and 15 pounds of chopped alfalfa hay. As a daily ration, he suggests feeding from one to three pounds, depending on the size and condition of the sow. He says also that if house waste, sweepings from the cow mangers, or poor silage are available, they may be spread on the ground where the sows can get at them. Skim milk may take the place of the protein part of the above ration, he says.

The breeder should remember that he is feeding not only the sow but the young pigs. Professor Hinman declares, and he should make ample provision for the heavy drain on the sow's vitality, particularly toward the end of her pregnant period, as that is when the most growth of the young pigs takes place.

### Food Value of Molasses

Feeding molasses has a food value of its own, especially in cold weather, when its heat-producing carbohydrates furnish energy in abundance. That is one reason why stock that is fed molasses will usually be found in the spring with sleek, shiny coats. It also adds to the palatability of feeds, especially roughage, and will encourage the cows to eat more of this.

### Live Stock Items

The only stock that should be abundantly watered is live stock.

It does not pay to grind or soak corn for pigs or large hogs.

Keep the horses busy. Every day they stand idle increases their upkeep.

Water is essential for all animals, but a bountiful supply is especially important for young, growing animals.

### SCHOOL TAXES TO BE CUT NEXT YEAR

The budget committee for school district No. 8, consisting of the three directors and M. T. Clinton, M. O. Hawkins and J. A. Lamb, met Wednesday evening to adopt the budget for the coming year. The directors submitted their estimate of the probable receipts from all sources, except special tax, at \$77,186.45.

After the committee had listed the following necessary expenses for the year, the total was found to be \$104,390.84, leaving \$27,203.89 to be raised by special tax. This is \$13,000 less than was voted last year and shows the downward trend for which all taxpayers are looking. \$8,422.70 of this reduction is due to the increase in probable receipts from the other sources than special tax.

The directors also held a meeting the same evening at which a special meeting was called to be held on June 21, a night 9 o'clock at the high school building, the same time at which a director and school clerk are to be elected.

The clerk was instructed to take out \$4,000 in insurance on the new grade building and more, as the work progressed, up to within \$2,000 of its cost.

Architect Chas. Burgraf was paid \$340.92 which included 35 per cent of his fees for services in planning the new building.

At the board's meeting last Saturday evening, J. D. Graham, inspector of construction on the new building, reported that \$4,000 had been expended for labor and material there, and T. J. Halstead was paid \$3,000 on account.

All teachers, except Carolyn G. Wilson and Lena Crump, having accepted the election tendered them by the board some weeks ago, contracts were entered into by the board with them.

The board requested J. D. Graham to estimate the cost of wrecking the old building, a new fire escape at the east end of the grade building.

This was in compliance with the recommendation of Chief Gardner, who also filed other recommendations with the board which were approved by the directors.

The list included a recommendation that the room under the front steps at the grade building be kept free from all trash and other articles except the floor of basements, that the blower room be not used as a depository for anything; that automatic openers be placed on the front doors of the building.

For the high school the recommendation was that the furnace pipe in the basement be asbestos-covered; that automatic openers be placed on the north and south doors leading to the fire escapes; that a fire alarm button be placed in the basement; and that a demonstration of the use of hand chemicals be given at the beginning of every school year.

### Proper Feed Will Make Vigorous Litter of Pigs

The greater the number of pigs raised per sow the less the cost per pig. The unborn pig is built quite largely of protein, hence the necessity of feeding plenty of protein to the sow from breeding to farrowing time in order that she may produce a large, strong, thrifty, vigorous litter. Live stock authorities at the Kansas State Agricultural college. The brood sow should have either one-half pound of tankage, one pound of linseed oil meal, one pound of soy beans or one gallon of skim milk or butter-milk per day to furnish the needed protein, they advise.

### Live Stock Hints

Young animals make the best use of feed.

The most effective method of ridding cattle of lice is by dipping.

Do not feed molybdenum to horses if you wish to avoid serious ailments.

A beef cow carries more fat under her hide than a dairy cow, and fat is a most excellent nonconductor of heat.

Two severe taxes on pig growth are worms and lice. Cleanliness aids mightily in combating both.

Hog cholera ordinarily causes large losses to farmers during the fall and winter months. Vaccination is a preventive but must be done before the hogs get sick.

Too many pigs should not be put together. Even though none may be hurt, a large number bunch up and become so warm that colds result from going out into the winter weather.

### Maybe So.

Diogenes must be looking for a filling station by this time.—Louisville Courier-Journal.

### Handy Bathtubs

An Atchison (Kan.) plumbing supply dealer advertises in the Globe: "Bathtubs for all seasons."

## LIVE STOCK NEWS

### SYSTEMATIC FEED FOR YOUNG LAMBS

It has been pretty definitely established by pathologists at the experimental station that too many peas, or too much corn, is the real cause of most feed-rot lamb losses. Cornfield feeders are controlling their losses by systematic herding and the feeding of a variety of feeds such as beet tops, alfalfa stubble and grain. The same methods can be resorted to in the San Luis valley, using alfalfa, cull potatoes, beet tops and sheaf grain, getting the lambs filled up well before herding on peas.

A good method would be to feed lambs cull spuds in the corrals in the morning, then a full feed of alfalfa hay, and then turn them on the peas. Bring them in at night for another feed of spuds and a little hay to last them the night, and leave them fairly hungry for a spud feed in the morning.

Alfalfa has been found unsatisfactory in many cases because the lambs are not fed enough. A few mouthfuls won't keep them from eating too many peas. They should eat at least two pounds daily to affect pea consumption.

Mineral mixtures are indicated for certain things, but preventing death loss by unlimited feeding of them in the penfold doesn't seem to be one of them. These big 65 to 80-pound lambs have a big capacity for feed consumption and can't stand the amount of concentrated feed they are consuming.

We have a tendency to look for panaceas and to hope for some serum or powder that can be administered or fed to solve the trouble. When we get down to improving our feed management system, so that our lambs get a well-balanced ration and are forced to eat a definite amount of roughage, and besides are fed a variety of feeds with the peas, only then will these losses come under control.—E. J. Maynard, Colorado State Experiment Station, to San Luis Valley.

### Gave Name to Metal

Babbitt metal takes its name from that of its discoverer, Isaac Babbitt, an American inventor, a native of Massachusetts. The metal was invented and patented in 1839.

### A Pertinent Remark

"I'm always springing something," said the mouse as he walked into the trap after a piece of cheese.—Utah Humbug.

Jim Edwards couldn't see such Extravagance

Instead of letting rust and decay "get" them, Jim safeguards all his buildings, also his tools and implements, with Acme Quality Paint. He says neglect is an extravagance he won't stand for, and that the paint not only protects, but beautifies his property, and makes it worth more. Be sure you, too, use

Why your baking will not burn

Did you know that the Florence Oven has the baker's arch, curved at the top to prevent air pockets?

Then too the heat in the Florence Oven is not concentrated over the burners, for an asbestos-lined air chamber with a triangular shaped bottom deflects the heat and distributes it evenly over the top and sides.

Roasts or delicate desserts can be watched through the glass doors of the Florence. You will see the moment these dishes are ready to serve.

Do come in and let the Florence Oven prove all this to you.
