New Cases in Circuit Court

July 9—T. J. Scaife and A. H. Hodgins vs. Wm. M. Wohlender, Julia W. Wohlender and Equitable Savings & Loan Assn.

July 9—Jas. C. Saint vs. Chas. Richert and Western White Cedar Co. July 10—Coos Timber Co. vs. Merchant Savings & Trust Co., Commercial Trust & Savings Bank, of Portland, and Guy S. Calkins.

July 12—Dorothy W. Bill vs. Albert J. Bill. Suit for divorce.

July 12—State Industrial Accident Commission vs. Fred Parry.

July 12—State Industrial Accident Commission vs. M. T. Aasen.

July 12—State Industrial Accident Commission vs. Chas. Thom, Jas. Sues and Jack Morgan.

July 12—H. G. Kern vs. Nels T. Peterson.

July 12—W. N. Ekblad vs. Thos. A. Sweeney and F. J. Kernan.

July 13—Jessie Westheffer vs. Western State Life Ins. Co.

July 13—May C. Middleton vs. Chas. O. Middleton. Suit for divorce.

July 15—Margaret Lorena Hamlin vs. Floyd W. Hamlin. Suit for divorce.

Marriage Licenses

July 10—Jos. I. Berghamer and Lora Cole, both of North Bend. They were married the same day by Judge Mast at the court house here.

July 10—Isaac Everett Smith and Lila Nickerson, both of Marshfield. They were married the same day by Rev. D. P. Henry at the Bay.

July 10—Arthur R. Langille and Mary Hartman, both of Marshfield. They were married on Sunday at the bride's home in Marshfield by Rev. Thos. W. Radford.

July 12—Heber J. Wallace, of Lewiston, Idaho, and Neva McFarland, of North Bend. They were married Monday by Judge Mast at the court house.

July 15—Ernest Coleman and Agnes Payne, both of Marshfield.

Don't worry about your battery when you can take it to an expert at the Coquille Service Station and have it inspected.

Forecasting a Through Highway

The following press notes from Tia Juana, Mexico, and Vancouver, B. C., recall to the Sentinel editor what Albert D. Richardson was predicting in his book "Beyond the Mississippi," fifty years ago of the spreading of our railroads down through Central America and into South America:

Salutations exchanged between Mayor Palacio of Tia Juana, Mexico, and Mayor Taylor of Vancouver, B. C., via the Chevrolet press car, were the result of an international introduction and served to further cement relations between the two cities.

Realizing the possibilities of this unequalled motor road as a means of attracting desirable automobile visitors to their gates, the Vancouver Chamber of Commerce has instituted a great advertising campaign based on information gathered from the log of the Chevrolet press car on its recent international run.

Vancouver's mayor writes of plans now under consideration for the continuation of the great motorway up through British Columbia and northward to the very border of Alaska. At the lower end of the concrete ribbon, Mayor Palacio sees possibilities of the extension of this greatest of all roads southward along the coast through Central America and, in time, down to the Panama Canal Zone.

The well directed efforts of the Chevrolet Motor Company in launching such a travel boosting project have brought rich returns for the west in the form of increased motor travel up and down the western empire. Now that the ball is rolling various civic organizations of the Pacific Coast cities have taken up the banner to the end that the "Longest paved stretch in the world" shall be the most widely known as well as the greatest automobile highway in the world.

Probate Court Items

Paul Raubach, of Marshfield, was last Saturday appointed executor of the will of Gertrude Raubach, who died at Marshfield June 27, leaving an estate estimated to be worth \$1,000. Reider Bugge, Jos. E. Williams and Carl W. Everson are the appraisers. Gustav Ragnar Carlson, of Marshfield, filed notice Saturday with the county clerk of his intention to apply for citizenship papers. He is 30 years of age, a native of Sweden and came to the United States in 1922.

Four Divorce Cases Heard

Three divorce cases were heard by Judge Kendall in Circuit court yesterday and they were taken under advisement. They were the cases of Lottie B. Cappions vs. Walter Cappions, Joseph V. Negles vs. Ruby P. Negles, Jincy A. Werth vs. G. O. Werth.

On Tuesday the judge granted a decree in the case of Mary E. McAllister vs. Harry G. McAllister.

Electric motors in the United States are doing work equivalent to that of 170,000,000 men.

Bandon Defeats Coquille Again

Second Half

	W	L	P	C
Bandon	5	0	1	000
Coquille	3	2	0	000
Coos Veneer	1	4	0	200
Marshfield	1	4	0	200

Bandon has the Indian sign on the Coquille ball club this year. In eleven league games now (the one at Port Orford July 5 with Coos Veneer was not a league game as has been erroneously stated in most of the county papers) Coquille has lost four games, every one to Bandon. And all have been by close scores except the one on the Fourth.

The last game was with Bandon here Sunday, which the visitors won 4-3. Aside from the home run by "Lefty" Brown and the three bagger by "Penny" Sturdivant, the locals could do very little with Winters, Bandon pitching ace.

But even so, it was one bad inning, in which Art Pulford contributed two bobbles, that lost the game.

Mulligan made the star play of the afternoon when he raced over and scooped one off the ground, which had got by Lonny Frye at third, and threw his man out at first.

The box score would indicate that "Penny" was hit pretty hard, but most of the twelve safeties secured by Bandon were of the scratchy variety, and if Coquille had been hitting up to the season record four tallies would not have won the game.

It is generally admitted that the O. A. C. pitcher, Jess Winters, is the best bet in the county league this year. He has a good curve, mixes them well, and is a marvel at fielding his position.

Coos Veneer won its first league game Sunday when the newest club in the league defeated Marshfield 6-4.

Bandon	A	B	R	H	P	A	E

Coal Found at Bandon

Several parties in Myrtle Point who own real estate in and near Bandon are highly elated over a report brought here yesterday that they have discovered a good measure of coal at that place. The discovery is said to have been made by parties living near the old race track.

Government maps show that a large measure of coal underlays Bandon and vicinity.

L. Strong, Myrtle Point hardware merchant, owns ten acres near the race track and Mrs. Mitchell, living on Maple street, near the depot, also owns land near the reported discovery.—Myrtle Point American.

Large Expenditures for Roads

The largest road expenditure in any one month for the past two years, and probably the largest ever to have been made in the history of Coos county, is indicated by the road bills allowed by the county court last week. They totaled \$73,583.81, divided among the following funds:

General road fund, \$9,740.79. Special road fund, \$15,192.44. District Maintenance, \$1,897.39. Bond Series No. 1, \$26,503.93. Market road fund, \$20,249.26.

The next largest in the past two years was last August when the aggregate was \$72,000.

Most readers will be astonished to learn that the coal used for locomotives on the railroads of the United States amounts to one ton of every four mined in the United States.

Why not eat Sunday's dinner at the Hotel Coquille? You'll enjoy it, as well as a day of rest.

FEED IMPORTANT FOR THE HEIFER

It is important that the young heifer be fed so that she will grow at her maximum. It is not necessary that she be fat but she should receive such feeds as will furnish nutrients for the building of bone and body tissue, and keep her system in the best of condition.

Good alfalfa hay will furnish a large portion of the nutrients necessary for growth, and good silage will do the rest. The undersized or otherwise unthrifty heifer should be given a little oats and corn, in addition to the alfalfa hay and silage. This same treatment is given the heifers the second year, until three or four months previous to calving, when oats and corn, bran and a little oilmeal is fed.

It is good herd management to have the heifer, and also the aged cow, in good flesh at the time of freshening. She will then have reserve material to draw upon after freshening. The heavy producing cow will lose in weight after freshening for a month or more, even with liberal feeding.

If the cow is being grain fed preparatory to calving, the ration should be reduced and more of the laxative feeds such as oilmeal and bran added four or five days before she is due to calve. If the cow is in good physical condition, she will have less trouble in calving and will not be so subject to retention of the afterbirth. When the cow is in good physical condition the afterbirth is usually expelled within three to six hours. If it is not expelled it must be removed within the first 24 hours. When this becomes necessary the cow usually gets thin and decreases considerably in milk flow. It is, therefore, very necessary to watch the feeding and physical condition of the cow previous to calving.

Clear That Clean Milk

Is Paying Proposition

In recent years dairymen, including farmers with just a few cows, have been learning that clean milk is a paying proposition and that this may be secured only by obtaining proper sanitary measures, such as providing clean animals with clean bedding, regular clipping of flanks and udder, and the like. More recently, the importance of agriculture has been secured as the result of extensive tests, that another of the dairymen's problems, undesirable flavors and odors in milk produced by feeding green alfalfa, green corn, or turnips, may be prevented by giving these feeds at the proper time.

It has been found that green alfalfa produces much more pronounced "off" flavors and odors than does green corn. Even when 25 pounds of green corn are fed one hour before milking the milk is only slightly tainted, probably not to a sufficient extent to be detected by the average consumer; if fed after milking, nothing undesirable is noticed.

Feeding 30 pounds of green alfalfa one hour before milking, or as little as 15 pounds, produced objectionable flavors and odors. Increasing the time to three hours reduced the intensity, but did not eliminate the taints. However, when the time before milking was increased to five hours the off flavors and odors were practically eliminated.

Dairymen Waste Leaves of Alfalfa and Clover

Thousands of dollars have been wasted by New York state dairymen who have swept alfalfa and clover leaves out of their cow's mangers, says W. T. Crandall, of the state college of agriculture at Ithaca, N. Y.

The reason for this is that with good legume hay only 15 to 18 per cent of the total protein is needed in the grain mixture. Cows getting heavy feeds of higher protein mixtures lose their appetite for protein, explains Mr. Crandall, and so they refuse to eat the legume hay leaves, which are highest in protein content. Alfalfa leaves have 22.5 per cent total protein, while the stems have but 7 per cent.

Dairymen should never have to sweep these valuable leaves out of the mangers, says Mr. Crandall, as they are thereby sweeping out some of the best feeds they can give their cows. "Cut down on the high protein grain," he advises, "and feed the cows the cheaper and better home-grown hay. If you swept leaves out of the mangers, you were feeding just that much more protein than was necessary, and next fall you should cut the amount so that the cows will clean up all the good alfalfa and clover hay."

Changes in Cow Tests

Changes in the test of an individual cow is influenced more by the temperament of the cow than by any other factor. If she is quiet and milked at regular intervals the test of her milk will run more uniformly than that of milk from one that is milked at irregular intervals. If a cow is slightly off feed or feverish the test of her milk will usually be higher. If the period between milkings is longer the milk will usually test less than during the shorter period.

Sixty Days for Contempt

Fred Hauschildt was found guilty of contempt of court yesterday and sentenced to 60 days in the county jail. After serving one day he is to be paroled on condition that he pay the \$30 a month for the support of a minor child, ordered when a divorce decree was made last year.

Marshfield Won the Case

The jury in the case of Perkins vs. the City of Marshfield on trial last week, brought in a verdict for the city last Friday evening. The jury's idea was that the city was not responsible for the damages sustained when the basement of the Myrtle Arms was flooded during an unusually heavy rainy season.
