Goodyear's new balloon TIRE

In the 29x4.40 size, \$12.85

The new tire shown above is the famous Goodyear All-Weather Tread, scientifically redesigned for balloon tire use.

The first advantages of this new tread are traction and resistance to skidding.

The sharp-edged, diamond-shaped blocks are placed in a semi-flat design so that they not only grip the road but they retain their usefulness longer than any non-skid ever before tried.

The second advantage is long, slow, even tread wear.

And with these virtues of traction, non-skid and long wear, this new tread is perfectly quiet and does not produce the vibration of many non-skid designs.

We have this new tire in the following sizes:

29x4.40	\$12.85
30x5.25	21.25
31x5.25	21.95
32x6.00	25.65
33x6.00	26.55
