Cream O'Coos Cottage Cheese—a health food. Ask for it at your dealers.

Farm Market Review

Wool—The Boston market was more active again last week, with some advance in asking prices on domestic wool on increasing inquiry from mill operators. No particular change was noted in the mohair situation.

Livestock—Heavy beef steers advanced again last week in eastern markets to new high levels for the season and all other classes except bulls were in strong demand on light receipts. Western markets were steady but anticipating more grass cattle. Hogs took a slight upturn in eastern markets when receipts fell off. More half-fat and grassy pork is arriving. Portland was steady but San Francisco weak on hogs. Lamb markets weakened materially in the east but held nearly steady on the coast.

Butter—Score 92 brought 42 to 43 cents at San Francisco and was in good demand. Poor grades went slow. Eastern butter markets were unsettled but there was no decline in prices. "Centralized" stocks moved very slowly. The shortage of cold storage butter compared to last year has about been wiped out. Production is running over last year and conditions are still good in leading dairy section.

In proportion to population, there are about ten times as many telephones in the United States as there are in Europe.
