### Elastic Arbor Day

The American Tree association says that the law in New York state is very elastic in respect to Arbor day and permits of naming the date sectionally so as to take full advantage of climatic conditions in different parts of the state. Hence there are three Arbor days in New York—one for Long Island, one for "Upstate" and one for northern counties. As a rule, the last Friday in April and the first two Fridays in May are the dates selected. California observes March 7, the birthday of Luther Burbank.

### Malicious Justice

Certes, I have often been vexed to see judges impudently making use of fraud and false hopes of pardon and favor to cozen a poor criminal into a confession of the fact alleged against him. It would become justice, and Plato himself, who countenances this

manner of proceeding, to furnish me with other means more worthy of my approbation; this is a malicious justice, and I look upon it as no less violated by itself than by others.—Montaigne.

### Knew His Stuff

One of the janitors out at the Big U applied for transfer into the transportation department as a mechanic. "But why do you think you would make a good auto mechanic?" Manager Kurland wanted to know.

"Well," said the applicant, "I've been studying it and I've found that all it amounts to is, that while you're supposed to be fixing one part make sure that you break something else."—Los Angeles Times.

Call Farr & Elwood for transfer and fuel.

### MYRTLE POINT ITEMS

Mr. and Mrs. Thos. Guerin and daughter, Alice, returned Friday from a trip to California. They visited with relatives in Oakland and also visited the Chas. Guerin family in Los Angeles.

Mrs. E. C. Barker and Mrs. Max Dement were Coquille visitors Saturday.

Miss Francis Fernley returned home last week from a several weeks' visit with friends and relatives at Portland, Salem and Aurora.

Eugene Ramsay is spending his vacation with his sister, Mrs. Hosman. Eugene is making his home at the Masonic home at Forest Grove.

Mr. and Mrs. Chas. Woolridge and baby left last week for Eugene, where they will visit for two weeks. Mr. Woolridge is salesman in the Huling and Lundy hardware store.

Mr. and Mrs. Edwin Schroeder and son, Milton, left last week for a three weeks' visit in California.

Mr. and Mrs. J. D. Barklow are spending this week with their daughter, Mrs. Banks, in Portland.

O. E. Marsters, of Pixley, California, is visiting home folks for ten weeks.

The Rev. C. C. Hulet family left last week for Albany where they will make their home. Miss Evelyn will enter Albany college next fall. Their son, William, is already a student there.

Miss Kathryn Dunham and Mrs. Clarence Church spent the Fourth with Miss Dunham's relatives on Coos River.

Orin Hazelton returned home from Klamath Falls, where he has been working with his father for some time.

Mr. and Mrs. T. M. Shorey are enjoying a visit from Mrs. J. L. Shorey and daughters, Alice and Kathleen, of Woodburn.

### Courtesy Parking Discussed

One aspect of courtesy in motorism that deserves more attention as the problem to which it relates becomes more complex is that of parking in such a way as to conserve the greatest amount of space, says Aileen Wilson, Secretary of the Coquille Branch of Oregon State Motor Association, who further points out that the smaller towns also have their requirements with reference to parking space.

"The business districts of both small and large communities offer a problem in the matter of parking space that, while not entirely solvable by a changed attitude, can be rendered less acute and difficult by the display of courtesy on the part of the average motorist," says Miss Wilson. "Slovenly parking is a mark of selfishness that is getting to be more and more emphatic as the motor car comes into greater and greater use.

"There is very little excuse for it, under any circumstances. It may take more time to drive into a space such a way as to use no more of it than is absolutely necessary, but certainly it is time well spent. The road-hog is an old and dishonorable figure in motorism. The parking-hog is becoming even more common than the road-hog. In some respects, he is even more of a nuisance.

"It seems high time that the average driver began to look into his parking technique. If he is guilty of carelessness or selfishness, he will have no difficulty in recognizing his faults if he will but take the trouble to conduct a self-inventory. Does he take more than his rightful share of the available space? In parallel parking, does he leave the rear of the car so far from the curb that backing into the space behind is impossible? The answer to these and similar questions is an unequivocal 'yes' or 'no.'

"There is room for improvement in parking courtesy and it is up to the individual car owner to correct his own attitude in this vital respect."

### Richmond Hospital Notes

Gordon Hanscom underwent a major operation by Dr. Jas. Richmond Monday morning.

Alda Sloan is recovering nicely from an operation for appendicitis at the hospital Wednesday morning.

The Oregon Farmer can now be secured in connection with the Sentinel for 25 cents a year; 25 copies a year.

The Farmer Boy with cheeks of tan  
Grows up to be a robust man  
Says he: "I feel as fine as silk  
Because I get my share of milk."

—and he adds it's Cow Bell Dairy's milk — of course

### Value of Hen Depends on Prices Prevailing

A hen may produce more eggs in a year than any bird in the flock, but yet is not as valuable as some other hen that produces less eggs. The hen that produces the largest number of eggs during the seasons of high prices will have the advantage in egg values over another bird which is idle at that period, and which may produce more eggs during the year. The real value of a hen will depend largely upon the persistency as well as intensity of production. Reliable records have been kept at the North Dakota Agricultural college of the good laying hens.

"As an example, one hen produced 203 eggs in 1925 which were sold for \$6.75, while another produced 219 eggs which brought \$6.50. The second hen had laid 16 more eggs, but the eggs sold for 16 cents less due to the fact that this hen did a greater proportion of her laying during the spring and summer when eggs were cheap."

### Poultry Notes

Always have feed and water available when lights are on.

Face the henhouse to the south. Make the north, east, and west sides wind proof.

Ground oats may be used for growing stock or laying hens when fed in limited quantities.

Danger from overfeeding is lessened if the chicks are fed often and a little at a time for the first few days.

Red juries may be controlled by thoroughly pointing the house with carbolineum. Spraying coal-tar dip is also effective.

The greatest need of poultrymen today is not more hens, but better producing hens. Hens that will return a larger profit on the feed consumed.

Eggs going into the machine are just as important as the incubator itself, in the spring hatch.

Many digestive troubles are avoided if no solid feed is given for the first 48 to 60 hours, in order that the yolk in the chick's body may be partially absorbed.

There are four different kinds of oat feeds employed in chick feeds. Oat flour is used in practically all mixtures. It may be made at home if one has a huller.

Rye, oats, or spring wheat, or other spring grains would be very satisfactory as a forage crop for geese.

Boop, in its first stages, is nothing but a cold—the result, in almost all instances, of drafty, poorly ventilated poultry houses.

A good poultry house should afford protection from storms and severe weather because a little shelter from the winds and storms will add to the comfort of the fowls and thereby increase the egg yield greatly.
