Shades of Difference

in Term Thoroughbred

When you say another woman is a thoroughbred you feel that you have paid a compliment. What exactly do you mean?

One ingenious writer once explained that a real thoroughbred individual has a fine clear skin, fine hair of either light-brown, dark-brown, black, red or auburn hue, a bright clear eye—either tall or short but not excessively fat nor lean, regular teeth, well-proportioned nose, large nostrils, well-curved jaws, full, red and moist lips, well-rounded ears, a smooth or rich and full voice.

Probably your own notion of a thoroughbred has more to do with temperament, manner and mental traits than these purely physical features, though undoubtedly there are some physical characteristics that you do consider essential to the real thoroughbred.

Perhaps you feel that a thoroughbred must, simply must, have shapely hands—and that the woman who has very stubby fingers with nails considerably broader than long cannot be a thoroughbred. That notion goes along satisfactorily until you happen to meet a woman with short fingers and very stubby nails who really is very much of a thoroughbred.—Washington Star.

Dog's Claim as Man's

Most Faithful Friend

Most boys and many girls, and 10,000 times 10,000 men and women, love dogs. We don't know when this loyal, unfailing friend of man first met him, first learned to defend his flocks, his dwelling, his person and the lives of those dear to him, but wherever we have this creature we call man, there we have found his faithful friend and companion, the dog, always willing to follow him through thick and thin, never seeming to care for an instant whether his master was rich or poor, wise or ignorant, saint or sinner, alas even when beaten, starved, cruelly treated, ready to lick the hand that has hurt him. A good man once said, "When

my father and mother forsake me then the Lord will take me up." Might not one say that, when a man might feel forsaken of every earthly friend, there would still be looking up into his face the gentle, trusting eyes of his devoted dog, saying by every look and sign, "Where thou goest I will go, thy lot shall be my lot, 'nor shame, nor loss, nor prison bars shall move me from thy side.'"—Chicago Post.

Electrical Dust Storms

Dust storms, which charge barbed wire fences to a high voltage, stall automobiles by interfering with their ignition systems and add new worries to radio listeners by causing even worse static than thunderstorms, are among the curious phenomena that visit sections of the great plains east of the Rockies in dry seasons, says Popular Mechanics Magazine. In northwestern Kansas, during one of these disturbances, a man became curious about the amount of electricity his aerial was collecting and connected it with the ground wire through a 32 candlepower light. He obtained as brilliant light as when it was connected with his automobile battery. No thunder or lightning occurs during these electrified dust storms, nor is there any known relation between them and earth magnetism. Any metallic object insulated from the earth seems to become highly electrified.

Sounds That Climb

Recent tests show that the growing of a rooster, the ringing of a church bell, and, under some conditions, the shout of a man, penetrate almost a mile into the upper air. A cricket's chirp carries up 2,500 feet, and the croak of a frog can be heard at an altitude of 3,000 feet. Among sounds produced by living things, a dog yelp holds the altitude record. It has been heard by balloons at 5,900 feet up. The report of a rifle will carry about the same distance. Of all sounds recorded, a locomotive whistle reaches highest. It has been heard in than two miles above the earth.—Popular Science Monthly.

Arrivals at County Jail

Arrivals at the county jail the past week number three. Jack Gaffney is accused of being implicated in the attempted robbery of a service station at North Bend last Thursday night, when a man passing was hit over the head and relieved of his wallet. Gaffney is held under \$1,000 bonds for assault and robbery.

A. J. Strong, of Coquille, is charged with obtaining money under false pretenses and will have a hearing at two o'clock this afternoon in Justice Stanley's court. The particular offense on which he was arrested was for passing a check for \$6.75 to the Hotel Barber Shop, on a bank in which he had no funds. He has been in jail for a similar offense before.

Arthur Coach was bound over to the grand jury and his bond fixed at \$1500 by Justice Young at Bandon Monday. He is charged with assault with a dangerous weapon, and for threatening to kill his wife at their home south of Bandon.

James Caughell Improving

"Hode" Caughell, who returned Tuesday from Gold Beach, says that his brother, Jas. M., has not suffered any relapse and expects to be home in another week. Jim was still feeling the effects of the treatment he received in Portland, and has not been so well since the accidental death of their brother, Frank.

It will never be known how the tragedy occurred. Frank had cautioned his helper about the 2300 voltage wire and was on one of the cross arms of the pole. No one saw him when he took hold of the wire.

Coquille "Pirates" at Bandon

The juvenile Pirate club of Coquille—Margaret Paulson, Sarah Margaret Nye, Elizabeth Pierce, Audrey Aasen, Madeline McKeown, Betty Glaisyer and Carol Young—spent Wednesday and Thursday at the J. E. Paulson cabin on the beach at Bandon. So far as heard no vessels were scuttled nor even boarded, during the piratical invasion of the city by the sea. Mrs. Paulson and Mrs. H. A. Young accompanied them.
