

You Cannot See the QUALITY but you can see the NAME!

Buying the best tire value for your money would be a difficult problem—except for one thing.

That one thing is the great name GOODYEAR boldly cast into the sidewall of a tire.

Tires resemble one another in general contour; good rubber and poor look much alike; the eye cannot easily penetrate hidden weaknesses or strength.

But whenever you find that name Goodyear on a tire you can be SURE that tire embodies a quality that so far is peerless and supreme!

WHY is this true? What are the facts behind the Goodyear Tire that give its name this priceless meaning? Briefly, they are these:

Goodyear Tires are the chief product of the largest rubber company in the world.

Goodyear Tires are so outstandingly superior in quality that last year their percentage of gain in sales was nearly THREE TIMES the percentage of gain in sales recorded for the industry as a whole!

That is why the leading motor car manufacturers, seeking the best in tire equipment, use MORE GOODYEAR TIRES THAN ANY OTHER KIND.

That is why the cost-wary owners of the great truck fleets of industry, seeking utmost economy, use MORE GOODYEAR TIRES THAN ANY OTHER KIND.

That is why the purchasing experts of the urban, interurban and transcontinental bus lines, seeking safe and a profitable operation, use MORE GOODYEAR TIRES THAN ANY OTHER KIND.

That is why throughout the world it is true this year as for FOURTEEN years past, that "MORE PEOPLE RIDE ON GOODYEAR TIRES THAN ON ANY OTHER KIND!"

SO don't be misled by the specious plea of the tire dealer who would take your good money for something less than Goodyears, when he says, "All tires are about alike." You know the answer.

You cannot see the quality, but you CAN see the NAME!
