Penney President Denies Merger

Considerable interest has been aroused over the report in the daily press that the J. C. Penney Co. and Sears-Roebuck corporations are to be merged. The following official denial that such a merger is pending is made by E. C. Sams, president of the Penney Co.:

The executives of the J. C. Penney Company have not discussed the basis of a merger with any Chicago mail order house.

Some time ago a committee was chosen from our executives to study the economic advantages that might grow out of the merging of our organization with one or the other of the large mail order houses.

There are many unsolved problems in the field of distribution. Mass production has outstripped the facilities of distribution. Wherever possible, improvement is being made in the economics of merchandising in order to provide a better service for the consumer as well as generate a greater enthusiasm among the workers.

The initial study now being made by our organization to determine what benefits might be secured through a combination of mail-order and over-the-counter service will be completed in the near future.

No step further than this has been made nor will be made unless the facts resulting from the initial survey warrant further negotiations leading toward a merger.
