County C. of C. Met Here

First Three Story Building Here

In recounting last week the changes which have taken place in Coquille since that St. Patrick's Day fire in 1918, the Sentinel inadvertently omitted mention of the first three-story building ever built in Coquille. It was a frame building, belonging to M. H. Hersey which stood across the street from the Mt. States Power Co. office, where the Pelican cafe is now located. It was a frame building, of course, and the firemen did good work in stopping the flames there. The heat from its burning cracked several panes of glass in the First National Bank building.

In the morning the department answered a call to extinguish a blaze below the Ralph Noleser place, and about noon were called to the Earl West place on Spurgeon Hill, when a trash pile fire had spread down the hill.

The first such alarm was Saturday evening about 4:30 when the department was called to that section east of Patterson's Grove. None of the fires did any damage.

BANKERS STUDY CHAIN CHAIN BANKING

The Economic Policy Commission of the American Bankers Association has been specifically instructed by the general convention of the association to study and report on chain and group banking developments, as well as the proposal of the Comptroller of the Currency for an extension of branch banking in the national banking system, to permit those banks to conduct branches in the trade areas surrounding their locations.

R. S. Hecht, President of the National Bank and Trust Company, New Orleans, Louisiana, is chairman of the commission. The members are: George E. Roberts, Vice President, National City Bank, New York; N. Y. vice chairman; Nathan Adams, President, American Exchange National Bank, Dallas, Texas; Leonard P. Ayres, Vice President, Cleveland Trust Co., Cleveland, Ohio; Frank W. Blair, Chairman of Board, Union Trust Company, Detroit, Michigan; Walter W. Head, President, Foreman-State National Bank, Chicago; W. D. Longyear, Vice President, Security-First National Bank, Los Angeles, California; Walter S. McClucah, Chairman of Board, Commerce Trust Company, Kansas City, Missouri; Max B. Nahn, Vice President, Citizens National Bank, Bowling Green, Kentucky; Melvin A. Traylor, President, First National Bank, Chicago; Paul M. Warburg, Chairman of Board, International Acceptance Bank, New York, N. Y.; O. Howard Wolfe, Cashier, Philadelphia National Bank, Philadelphia, Pennsylvania; Gordon Edwards, American Bankers Association, New York City, secretary.

A survey showing the extent to which chain and group banking has developed in the United States has been made and issued in booklet form by the American Bankers Association of New York City.

SECTIONS WHERE SAVINGS DECREASED

A regional analysis of the drop in the nation's savings deposits in banks, as recently reported by the American Bankers Association's Savings Bank Division in its annual compilation for 1929 showing the first recession in national savings in the twenty years during which it has published this data, reveals that all sections except the New England and the Pacific States groups recorded losses.

The published figures showed that on June 30, 1929, the total savings deposits in banks and trust companies of continental United States stood at \$23,317,656,000, which was \$195,305,000 below the similar total for 1928, when there was an increase of \$2,300,000,000.

The regional analysis by state groups discloses, however, that the six New England states as a group gained more than \$28,800,000 in savings and 152,924 in savings depositors, while the seven Pacific states as a group gained over \$79,000,000 in deposits and nearly 378,000 in number of depositors. The gains in these two sections, however, were smaller than the gains recorded there for 1928. The sections which showed losses are the Middle Atlantic States, Southern States, East Central States and the West Central States.
