Flame cooking means blackened pots and pans to scour, it means smudgy walls and ceilings and redecorating expense.

The High cost of soot and the Low cost of Electric Cookery

WHEN you banish matches, flame and soot from your kitchen you SAVE many ways. No more standing at the sink, scouring disagreeable soot—ruining your hands and nails. You save redecorating expense—for there is no smudge to spoil the walls, ceilings (or curtains) all through the house, from kitchen to living room.

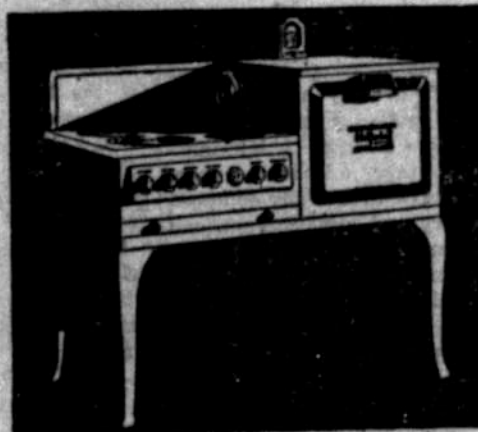

Electric cookery is now amazingly fast, with the Hi-Speed Calrod heating element. It is more economical than ever before... costs less than one cent a meal a person.
