COQUILLE

WHAT IS HOME WITHOUT A GARDEN?

Place: City Hall.
Time: 7:30 p. m.
When: First and Third Tuesdays.
President—Geo. W. Taylor, Sr.
Treas.—Mrs. John A. Martin
Cor. Sec'y—Mrs. Nellie Whereast.

This foggy morning kind of bodes a good day; any way it makes my feet itchy. I want to take my notebook and pencil and go nosing about your yard to see what flowers you have in bloom, what seeds are coming up and what bulbs are poking through the soil. I want to see who has tulips in bloom before I do and where you are going to put your new rose garden and pansy bed this year; and your sweet peas, too. That reminds me of a clover rack or trellis for sweet peas that I saw recently at Jack LeFevre's home on North Coulter street. It is a design of Mr. LeFevre's and has permanency while needed and yet can be taken down, or rather up, and stored out of the weather. Just go take a look at it, they will be glad to show it to you, I know.

Mrs. Gregg is having a pool and bird bath built in her yard. I have not had a chance to see it yet, but from what she has told me, I know it is going to be good. If we get a good day or so, I am going to go to see it. Percy Bean is sure improving his home. His lot is below the street level and Percy has eloped the ground from the sidewalk to the lot. In this he is putting rocks and filling in with plants. It certainly is going to be fine when finished and already adds to the looks of his place one hundred per cent. If you want to know the joys, trials and tribulations of getting rock, just ask Mr. and Mrs. Bean.

The Bender home on the corner of Seventh and North Heath is also looking up. Mrs. Ross, Mrs. Bender's

mother, is another who loves flowers and already I see flowers in bloom, in the beds around the foundation of the house. Mr. Bender is spading up a piece of ground for the benefit of the inner man. I wish more people would take an interest in the places they live in and put in a few seeds anyway.

Mr. Coleman has been taking care of the lawn and otherwise fixing up the place on Henry street to which they recently moved.

Mrs. Pook has already started her flower beds at the new home to which she expects to move soon.

Mr. Oeding, Mr. Fish and Mr. Aasen are other north end residents who have been fixing up their grounds more or less. All this improves not only their places but the town generally. I hope to get around town more in a few days and see what else has been done. Remember next Tuesday night is club night and we meet at 8 p. m. now. Tulips, any type and color, displayed in any kind of a container, are the contest flowers.

Sport Briefs

By Mark Seeley

Inclement weather has kept Bill Fortier's proteges of the ball diamond pennod up for some time, but on Sunday and from then on he will direct them in practice after practice in preparation for the coming baseball season.

What a time the boys will have this year competing for the league bunting and the trophies which go to the winners at the end of the schedule. If I don't miss my guess, Coquille and the other towns of the circuit are in line for some red-hot baseball of the home-town variety during the 1932 season. The renewal of the Marshfield-Coquille feud, and of those battles be-

tween individual players of these teams will be a real treat in itself.

At present a big question mark is focused when you truly scans the field in search of a possible winner. Coquille, Eastside and Marshfield should be strong. Reedsport looms high in my estimation, while the other aggregations are almost unknown but, according to advance notice, they should be up and coming. Sutherland, last year, was the top team of their section and judging from the ball players who have played around there, they are inclined to be rather fast. Larry French at one time resided in Sutherland, while Ben Turpin, of Seattle, pastimed at Yoncalla.

Years ago North Bend was a real ball town when the Frye boys, Driscoll, Bill Wilson, Murphy, Lefty Schroeder and others played for the Benders.

Marshfield staged a practice last Sunday morning with ten men of the younger variety reporting. Noble Brundage, Andy Feichtinger and the older heads did not turn out, trusting that hot weather would arrive soon to allow the testing of their joints.

Coquille can draw from Fairview, Arago, Riverton, and Myrtle Point for players, as these sections always play the game in the summer time. At least, Manager Fortier wishes any one who considers himself a ball player to turn out.

At the school men's meeting held in Coquille last Saturday, it was decided to hold the county track meet on May 14, one week later than the state meet. The meet is to be in charge of John Essman, Myrtle Point coach, while Guy Mauney, of North Bend, and Coaches Henry Hartley, Coquille, and Fred Osburn, Marshfield, will complete the committee.

As usual, the county event will be held on the fair grounds in Myrtle Point. Other meets between the schools will likely be scheduled elsewhere, but only records made on May 14 will be considered as official.

Oh! Yes! Jimmy Byrne fights Leo

County Agent Writes About Fertilizers and Lime

At this season of the year many farmers, truck gardeners, and others are considering the advisability of using fertilizers in order to produce more of a better quality crop. In view of the numerous requests for information of this type at this time the following information has been furnished by County Agent Jenkins.

It is a common occurrence in all sections of Coos county to hear farmers state that they cannot get the yield on certain pieces of land that they were able to get several years ago, also that they are not able to get stands of clover, vetch and other legumes. This would lead one to believe that attention should be given to the application of certain elements to the soil before it has been depleted to an unprofitable stage.

It is generally known in this section that soils throughout most of Coos and Curry counties are sour and that an application of limestone is necessary in order to neutralize the acid. More than two hundred tons of ground limestone were distributed among farmers of the county last year for this purpose and many times this amount could be used profitably. The limiting factor in the use of more lime has been the cost, and efforts are now being made to provide a source of lime at a much cheaper cost to farmers of the county.

The use of lime to correct the acid condition and the application of barnyard manure is without question the best means of providing the needed fertility in soils. This type of manure is not always available in large enough quantities to supply the farm needs and it may be necessary to depend on commercial fertilizers to supply the elements needed.

Of the fifteen or sixteen chemical elements proved long ago to be essential to the growth of all plants, experimental evidence has clearly shown that the lack of any one of four or five may become limiting factors in crop growth. None is absolutely lacking in any soil but unless each is available in the soil solution in abundance when needed, crop growth is hindered. Fertilizers are sold for the purpose of carrying to the soil one or more of the chemical elements: nitrogen, phosphorus, potassium and sulphur.

Nitrogen is readily available from dealers in either organic or inorganic form. Familiar examples are blood meals, tankage, nitrate of soda and ammonium sulphate. The nitrates are immediately available for plant use and if not quickly taken up by plants losses by leaching takes places.

Phosphorus, too, comes into the fertilizer trade from various sources such as bone meal, tankage and rock phosphate. The bone meals and tankage are inadequate to supply the demand and manufacturers are forced to fall back on mineralized sources of phosphorus in rock phosphate which occurs in vast deposits in various parts of the world. The use of raw rock phosphate as a fertilizer is questionable because of its relative insolubility in the soil. Fortunately rock phosphate is readily converted into more soluble forms and for that reason our native deposits of rock phosphates have an enormous economic value. While raw rock phosphate usually contains from 30 to 35 per cent phosphoric acid usually less than 1 per cent of this amount is available for plant use. If this same material is treated with sulphuric acid we get what is known to the fertilizer trade as super phosphate, containing from 16 to 20 per cent of phosphoric acid most of which is available for plant use. Probably the most up-to-date method of converting rock phosphate to the soluble form is with the use of phosphoric acid, giving a compound much richer in its phosphorus content, known as treble super phosphate.

There are fewer sources of potash than in the case of nitrogen and phosphorus. The most commonly used forms are muriate of potash and sulphate of potash. Both are of high degree of purity and from their actual content of potassium there is little difference between them.

To prevent chaotic conditions that might otherwise easily creep into the fertilizer trade to the detriment of both manufacturer and consumer the state fertilizer law, with the State Department of Agriculture as enforcing agency, sets forth specifically the conditions under which commercial fertilizers may be offered for sale in Oregon. This law states that every lot, parcel or package of commercial fertilizer sold in Oregon at a price exceeding five dollars per ton shall be accompanied by a label giving the chemical analysis stating percentage of total nitrogen, of phosphoric acid giving the amount soluble and amount insoluble, and of potash soluble in distilled water. The insoluble forms are of little value for plant use.

Lomaki but it doesn't matter on what date. They are to go for six rounds instead of ten, because Lomaki thinks Jimmy too heavy. Leo fights men as hefty and surely much faster than Byrne in the larger centers.

CONFIDENCE

METHODS tried and true through years of experience. Policies that have stood the test of time. Traditions. Those are the things that have earned for this bank the public's respect and confidence. You, too, will enjoy a sense of perfect security in dealing with this old, dependable bank.

Farmers & Merchants Bank

Coquille, Oregon

McKinley Notes

All of our sick folks are improving at the present writing. Jessie Lawhorn who had a relapse after a dose of the flu is again on the mend and perhaps by Monday will be able to attend high school at Coquille where she is a Senior. Archie Hansen is still out but is much better. He is a Freshman. Glenn Mast is on the sick list but hopes to be in class by next week. He is a Junior. Arla Jenkins is back in school. Wood Weathers has been out for several days with a bad case of flu.

Mrs. W. R. Brown (nee Hilda Loshbaugh), had a phone message Wednesday morning to come to Coquille as her mother, Mrs. Theo. Loshbaugh, had been taken to the Knife hospital there. It is not known at this writing how serious is the trouble.

At the regular meeting of McKinley Grange No. 582 at the community hall Saturday night the lecturer put on a program consisting of a "Snake Stunt" by Mrs. Lee Mast. Origin of St. Patrick's Day, reading by Helen Glenn. Song, "Mother Machree, Miss Verna Finley and Fay Freeman. A humorous reading by J. N. Gearhart. The last half of the literary hour was devoted to Easter. Anna Holmstrom, Lois and Norma Conles, Velva King and Elinor Maiden gave a short Easter playlette and tableau exemplifying "Faith." Mrs. Hansen, lecturer, gave an illustrated talk on the meaning and uses of the Cross. "The Lost Landmark," was sung by I. J. Bennett and Jay Freeman, while a beautiful painting of the subject was displayed. Mrs. Holmstrom was the author of the drawings. Miss Helen Glenn on the decorating committee, had the banquet table most beautifully decorated, using the Easter motif in keeping with the program.

On Easter Sunday the Sunday School had a very beautiful program of songs, readings and, perhaps the best of all or most unusual, a song and pageant, "Jesus Loves the Children of the World;" Elinor Maiden as a small Chinese maiden, Ivan Mast an Indian Chief, Delbert King a negro lad from Africa, Velva King a child wife of India and Ralph Holmstrom a boy from the U. S. A. Mrs. Holmstrom, the superintendent, painted a lovely background for the stage showing the empty tomb in the Garden on the Resurrection Morn, which added a great deal to the impressiveness of the program. Afterward lunch was served and the children enjoyed an egg hunt.

The hall board will give another dance Saturday night in an endeavor to secure funds to install a lighting plant at the hall similar to the one now in use at Brewster Valley hall. Rex Brown and Miss Rosabel Shone made a flying trip to Camas Valley and Roseburg Sunday. They report all the sick folks over there on the road to recovery and Mrs. Alva Brown, Rex' mother, having a very enjoyable visit there.

St. James Church

(Episcopal)
10:00 a. m. Church school. P. C. Roper, acting superintendent.
Sunday, April 3—Evening Prayer Service, at 7:30 p. m., conducted by Rev. W. E. Couper, of Marshfield.

Methodist Episcopal Church

Evening Preaching 7:30 p. m.
Prayer meeting Wednesday 7:30 p. m.
Preaching at Bandon Sunday 11 a. m.

G. A. Gray, Pastor,
187 E. 2nd St., Coquille, Ore.

The Pioneer Methodist Church

Philip D. Hartman, pastor.
Morning worship at 11 o'clock with a sermon on, "Jesus Becoming More Real." Communion service follows.
Evening worship at 8 o'clock with a message on, "Partnership With God." Sunday School at 10 a. m. Lyman Carrier, superintendent.
Both departments of the Young People's Division meet at 7:00 p. m. for devotionals.
Prayer meeting Wednesday evening.
Choir rehearsal Saturday evening. Special vocal musical numbers at both services Sunday.

Foursquare Gospel Church

Second & Heath Streets
Revs. T. R. and Vivalee Jackman, Pastors
Sunday 7:30 p. m. "Family Night," when a prize will be given to the largest family present. Every one will be urged to bring all their relatives. Mrs. Jackman will preach on "Glad Streams." A real old-fashioned sing will precede the evangelistic message.
11:00 a. m. Rev. T. R. Jackman will bring the communion message. All are invited to worship with us.
9:45 a. m. Sunday School. Mrs. M. Jewell, Supt.

Baptist Church

The church school meets at 10 a. m. every Sunday.
Morning worship and sermon at 11 a. m. Theme for next Sunday morning: "A Soul Winning Church."
The B. Y. P. U. will meet at 6:30 p. m.
The evening evangelistic service at 7:30 p. m.
Midweek prayer meeting 7:30 p. m. Thursday.
Choir practice every Tuesday evening.
We invite the public to our services.
A. B. Baird, minister.

First Church of Christ, Scientist

Coquille, Oregon
Sunday School at 9:30 a. m.
Sunday Service at 11 a. m.
Subject for next Sunday: "Unreality."

Wednesday evening meeting at 8 o'clock.
Free public Reading Room open in Church Building every Tuesday and Friday afternoons except holidays from two to five o'clock.
The public is cordially invited to attend our services and to visit the Reading Room.

Church of God

Corner of Seventh and Henry Streets
Pastor, Rev. Geo. S. Murphy
10 a. m. Sunday School.
11 a. m. Preaching services. Sermon on "The Church."
6:30 p. m. Young People's meeting. Leader, Farm Patrick.
