# DUNHAM'S OF course

## Feature Items

for Saturday and Monday, Apr. 23, 25

Mullay's Pure 4 OZ. Bottle **Vanilla 29c**

**Coffee** Purity 2 lbs. **59c**

**Shortening** LB. **7c**

**Shrimp** Broad River Brand 2 Cans **25c**

**Salt** 3 LB. BAG **7c**

**Oxydol** Washing Powder PKG. **15c**

Fontanas 3 PKGS. **Macaroni or Spaghetti 17c**

White or Golden 5 LB. PAIL **SYRUP 34c**

Rolled SACK **Barley \$1.05**

Broken Sliced 2 LGE. CANS **Pineapple 27c**

Red Mexican 10 LBS. **Beans 37c**

**Toilet Tissue** Rolls **17c**

Roosevelt Highway CAN **Fruits for Salad 17c**

**Wesson Oil** Quart CAN **45c**

**LEMONS** Large and Juicy DOZ. **17c**

Roosevelt Highway CAN **Tiny Corn 15c**

**Dynamite** 17c

For your breakfast PKG. **Toilet Soap 19c**

Lux 3 BARS **MALT 28c**

American CAN **Ripe Olives 15c**

**Grape Juice** Pt **19c**

Wheat SACK **Middlings 99c**

**DUNHAM'S of Course, Coquille - PHONE 81**

### Oil and Gas Possibilities

by Dr. J. E. Loreman

(Continued from first page.)

The rocks of the Coaledo formation are coarse sandstones, clays and shale, in the lower portion the sandstone predominates; then comes the portion of the workable coal, and the associated rocks consist of about equal thickness of sandstone, clay and dark colored shale.

Pulaski. The Pulaski lies beneath the Coaledo. Pulaski, because it forms the hills about the head of Pulaski Creek in Township 23, South of Range 13 West and forms the Pulaski Arch which separates the Beaver Slough and the Coquille coal basin. The Pulaski formation embraces all of the Eocene strata of the Coos Bay area, not included in the coal field.

The well originally drilled by the Fat Elk Oil Company to the depth of 1480 feet, from the samples of the cuttings which has been well kept, discloses a very interesting and favorable condition. The top 915 feet showed a stratified condition of sandstone, shale and thin strata of lime, three pronounced showings of gas. From 915 feet to the present bottom of the well the drill penetrated 565 feet of blue diatomaceous marine shale, carrying abundance of organic matter; these shales are highly petroliferous. It has been definitely established that the Pulaski Arch has formed a reservoir in which the accumulation of oil and gas could form, and that there are sandstones present within the shale, of sufficient thickness, and porosity for large accumulations of oil and gas. There is a constant emanation of gas coming from ten feet of open hole at the bottom of the well. The condition disclosed from the examination made, covering a period of more than two months are as follows:

The pronounced organic shales with their highly petroliferous content together with the favorable structure conditions, affording a favorable condition for the accumulation of oil and gas. I fully recommend that the well that has been drilled to the depth of 1480 feet be drilled to the production of either oil or gas or to a point of definite determination, which will be reached within 4000 feet.

### D. V. Yeoman Writes As To His Qualifications

Coquille, Oregon, April 20, 1932. To the Newspapers of Coos County, Oregon:

Gentlemen: I have been approached in several instances by representatives of the newspapers of Coos county, for news items regarding my approaching campaign for the nomination on the democratic ticket, for the office of County Surveyor. It has been my intention for some time to release a brief outline of my qualifications and experience in engineering for the knowledge and guidance of the voters of Coos county.

I was born and raised on a farm in Jasper county, Indiana; attended the common and high schools of said county; continued my education by attending Purdue and Valparaiso Universities, studying civil engineering.

My engineering experience embraces twenty years' work in engineering and business closely allied with the above profession, as follows: 4 Years in the office of the City Engineer of Gary, Indiana, as chief of party, inspector on construction of street, alleys, sewers and municipal buildings, draftsman, design, cost data and assessment rolls.

4 Years as county surveyor and special drainage engineer of Jasper county, Indiana.

2 Years as commissioned officer E. O. R. C., U. S. Army; overseas service with 1st Engg. Lt. Division; retired as Captain.

1 Year Indiana State Highway Commission as project engineer in plans and specification bureau.

1 Year mechanical engineer experience on truck & tractor motors, experimental.

4 Years in the sand and gravel industry as engineer, manager and owner.

2 Years in the building material industry.

2 Years with the U. S. Steel Corp., as engineer on construction of open hearth buildings and new trunk line sewer system.

I have this date written to the state board of engineering examiners of Oregon, making application for examination for professional engineer's license.

Respectfully yours, D. V. Yeoman.

### Have You a Favorite Hymn?

Have you a favorite hymn? If you have you are asked to write in a request to have it sung at the union song service to be held Sunday night, May 1st, in Pioneer church. The choral club will sing several beautiful choruses and lead the singing of the hymns. Send names of hymns early to Mrs. M. O. Hawkins or Mrs. E. A. Woodyard. This service is to be open to the general public and every one is invited to send in requests for hymns.

### Three Did Not Have Licenses

Fishermen who have failed to secure a license are getting into trouble these days.

Last Friday, Jim Hart, of Allegheny, was arrested by Sergeant C. A. Hearing. He was fined \$25 and costs by Justice Stanley here on Saturday and is now confined in the county jail.

W. O. Geve, of Coquille, for the same offense Saturday out on the North Fork, pleaded guilty Monday before Justice Stanley and was fined \$25 and costs.

E. C. Reeve, of Coquille, same charge, pleaded guilty Wednesday before Justice Stanley and is serving out his \$25 fine. He and Bacon Sanders were fishing that morning across the river from the depot and when they saw Mr. Hearing, on the depot side, they beat it out in a hurry.

An hour later Earl Williams, game law enforcement officer, drove across the bridge and descended upon Reeve, who had not seen him coming, and took him in charge. Bacon had not returned to the river.

### It Is Now Lion Cliff Rice

Cliff Rice was made a full-fledged Lion at the dinner session yesterday noon, the Lions' code of ethics being given by R. L. Stewart and the welcoming talk by W. V. Ferguson.

Geo. A. Ulett was presented with the Lion key emblem, he having secured two new members within a year.

The Lions' district in the unemployment canvass, the section south of First and east of Hall streets, was allotted by Pres. Jeub. They will make the canvass this week.

A new Masonic lodge is to be instituted in Gold Beach tomorrow evening and many Coquille Masons plan to attend. The charter was applied for some time ago and Grand Master Toney will be in attendance, as well as Grand Secretary Cheney. Refreshments will be served after the institution.

## WHAT IS HOME WITHOUT A GARDEN?

Place: City Hall. Time: 7:30 p. m. When: First and Third Tuesdays. President—Geo. W. Taylor, Sr. Treas.—Mrs. John A. Martin. Cor. Sec'y—Mrs. Nellie Whereat.

Another interesting meeting of the club was held Tuesday night with nearly 30 members present. It was tulip night again and considering the weather we have been having, there were some very good specimens shown. Mrs. Owen had a vase of green art pottery filled with long-stemmed "Bartigan," a beautiful red shade; Mrs. Beyers had a crystal vase of beautiful red Darwins; Mr. Grimes again carried off the cup with a vase of art glass filled with a lovely bunch of very dark red tulips; Mrs. Fortier showed some beautiful red tulips in a vase of cut glass. Mr. Taylor had a basket of mixed tulips, which were lovely. Mrs. Sloan had a pretty bouquet of the long-spurred columbines of pastel shades.

The earwig question again came up and Mr. Beyers reported that the Chamber of Commerce had donated \$5 to the fund, while a private donation of \$1 had been given Mr. Taylor for the same cause.

The matter of unemployment in our city was taken up by the secretary; this is a movement being carried on by the U. S. government, in connection with the Better Homes and Gardens campaign, of which Mrs. W. S. Sickels of this city, is the chairman. A committee of two will soon canvass the north end of Coquille, the district allotted to the Flower club.

Mrs. Beyers then took charge of the program, reading a very practical article on Potting Plants. This was followed by an article on the Flower, Tree and Shrub of the month, read by

the secretary. Mrs. Beyers told of visiting the fine new rock garden of Mrs. E. A. Vinton, which she has made entirely by herself.

The Flower Show in Marshfield last Tuesday was a very fine affair, Mr. Taylor said. He was one of the judges and in his talk last night gave particular mention to the wild flower display Japanese plum, kale used in the decorations and Mr. Alter's collection of Alpines. The matter of a test garden in our town was also brought up and discussed at length.

We took in two more members last night, Mrs. McCurdy and Miss Priscilla Hickam.

A talk on soil content was given by W. M. Cuning and a general discussion followed. While he had not made exhaustive soil tests, Mr. Cuning said that generally lime and phosphorus were lacking in our soil and on the use of super phosphate he gave particular caution and instruction. Owing to its strength it should not be put on too close to the plant; it should be put on the top of the ground, letting the rain wash it in, as spading it into the ground is liable to cause damage. By using wood ashes the necessary potassium is furnished the soil. Fruits and flowers need phosphorus and potassium.

For general safe use, he recommended the use of sheep guano three parts and steamed bonemeal one part. Mr. Taylor said this was his favorite formula also. The club is certainly very fortunate in having a man of Mr. Cuning's position a member of the club and he is more than willing to answer all questions he can (and he sure has them to answer, too.)

The next cup contest is for a mixed bouquet arranged in a basket. The next meeting date is May 3rd at 8 p. m.

## Be Like the BEE--

Provide for Future Needs

NATURALLY, the bee's never heard of Prosperity. He just goes ahead storing honey for the future, and then making good use of honey when the need arises. It's fine to spend. But first you have to SAVE. Wise saving and wise spending are an unbeatable combination.

## Farmers & Merchants Bank

Coquille, Oregon

### County W. C. T. U. Institute

Delegates from all sections of the county were in attendance at the all-day session of the Coos County Woman's Christian Temperance Union Institute held in the Presbyterian church at North Bend last Tuesday.

Routine business occupied the forenoon, the local Union reports showing much interest in helping the sick and needy through various phases of relief work, including food, clothing, nursing and visitation. The Children's Farm Home, which is sponsored by the state organization, has been aided to the extent of some \$75 worth of clothing since last January. These articles have been secured in the county and sent the children at the home.

The afternoon session proved one of the finest and most helpful yet, with inspirational talks by Rev. T. M. White, of the North Bend Church of Christ, and Rev. D. T. Robertson, of the Presbyterian Church of Marshfield. Music and readings were given by three North Bend ladies.

Dr. White discussed measures before Congress and their effect on the eighteenth amendment. The Beck-Linthicum bill gives the strength of the present Congress for and against prohibition.

Dr. Robertson is a former minister and prohibition radio broadcaster from North Dakota. He had his facts and figures well prepared to prove the benefits derived under the 18th amendment and stated in part that, "Beer taxed three cents a bottle to produce one billion dollars a year revenue would require a consumption of twelve and a half gallons of beer daily by every family in states permitting beer; that the liquor obtained from all the stills now in use is but a mere trickle to the liquor sold in saloon days; that drinking among women in Canada, under government control, has increased 53 percent."

The next County Institute will be held in Coquille June 7, 1932.

### 100 Barrels Flour for Coos

Mrs. Alida J. Bigelow, of San Francisco, field representative for the Red Cross, was a Coquille visitor Tuesday. She met with the local relief committee—Mrs. J. R. Bunch, Mrs. Ida K. Owen, A. T. Morrison and Ned C. Kelley—and among other things informed them that the 100 barrels of flour, made from government owned wheat, would arrive in Coos county shortly for distribution among the needy.

She also said there would be a Red Cross life saving program in this county some time this summer, conducted by those who have attended Red Cross institutes, which are held the last week in June. Of the eleven such institutes, where first aid is taught, three of the eleven in the United States are held on the Pacific coast.

### Were of No Value to Thief

Rev. T. M. Langberg, of Medford, formerly pastor of the Seventh Day Adventist church here, was a Coquille visitor the past week end with Mrs. Langberg and while here suffered a very annoying loss. He had his travelling bag, with books and other articles of no value to anyone else, in a car whose doors were locked, standing on the street just east of the Mrs. May Gage residence. Some time Sunday evening the car was broken open and his stuff removed. He is offering a reward for the return of the books. Although the matter was reported to the police there was no clue on which to start a search.

Calling cards 100 for \$1.50.

### First Church of Christ, Scientist

Coquille, Oregon

Sunday School at 9:30 a. m. Sunday Service at 11 a. m. Subject for next Sunday: "Probation after Death."

Wednesday evening meeting at 8 o'clock.

Free public Reading Room open in Church Building every Tuesday and Friday afternoons except holidays from two to five o'clock.

The public is cordially invited to attend our services and to visit the Reading Room.

### Church of Christ

Bible School at 10 a. m. Everybody welcome. You will fit some one of our eleven classes.

Communion and preaching at 11 a. m. with T. B. MacDonald delivering the message.

Christian Endeavor at 6:30 p. m., with five departments. This is very interesting to young and old and everyone is cordially welcome.

Prayer meeting and Bible study, also choir practice, Wednesday 7:30 p. m.

### Methodist Episcopal Church

Evening Preaching 7:30 p. m.

Prayer meeting Wednesday 7:30 p. m.

Preaching at Bandon Sunday 11 a. m.

G. A. Gray, Pastor, 107 E. 2nd St., Coquille, Ore.

### St. James Church

(Episcopal)

10:00 a. m. Church school. P. C. Roper, acting superintendent.

### The Pioneer Methodist Church

Philip D. Hartman, pastor.

Morning worship at 11 o'clock and evening worship at 8 o'clock. At both these services Rev. W. S. Smith will deliver the sermon.

Sunday School at 10 a. m. Lyman Carrier, superintendent.

Both departments of the Young People's Division meet at 7:00 p. m. for devotionals.

Prayer meeting—Wednesday evening.

Choir rehearsal Saturday evening.

### Baptist Church

The church school meets at 10 a. m. every Sunday.

Morning worship and sermon at 11 a. m.

B. Y. P. U. meeting at 6:45 p. m. The evening evangelistic service at 8 o'clock.

Special meetings every evening except Saturday, at 8 p. m. These meetings will continue through this week and next.

A cordial invitation is extended to all.

A. B. Baird, minister.

### Foursquare Gospel Church

259 E. 2nd Street

Rev. and Mrs. T. R. Jackman, Pastors Sunday 7:30 p. m. Rev. Vivalene W. Jackman preaching on "Stop, Look, Listen." The usual musical program will precede the message.

11:00 a. m. Rev. T. R. Jackman will preach on the important subject of "Prayer."

9:45 a. m. Sunday School. Classes for all.

6:30 p. m. Crusader young people's meeting.

Tuesday, Thursday and Saturday, 1:30 to 2:00 p. m. over KOOS, "Cathedral of the Air."
