International Harvester Enters 1/2-Ton Truck Field

Production plans of the International Harvester Company contemplate the delivery of its new Model D-1 1/2-ton motor truck from the factory assembly line in sizable numbers at once. During January it is expected that this new 1/2-ton unit will be on display at important points all over the United States, says Geo. F. Burr, local International Truck dealer.

The recent announcement of a new International 1/2-ton motor truck marks a significant milestone in motor truck history. For years International Harvester has been a leader in the production of a full line of heavy-duty motor trucks and speed trucks with ratings up to three tons. Now comes this new model D-1 1/2-ton International and, as a result, the size range of Internationals is enlarged, extending from the new 1/2-ton to the 7-1/2-ton heavy-duty unit in a variety of types. The new model D-1 chassis is priced at \$360.00 f.o.b. factory.

The extensive International Harvester

are of chrome-vanadium steel and have self-adjusting shackles. Forty-apoke, 18-inch wire wheels, a left front fender well, spare wheel, and spare wheel carrier are standard equipment.

In the design of the new D-1, special attention was devoted by the engineers to appearance, an item that is receiving increasing consideration by business people in the purchase of automotive delivery units. Two attractive types of bodies are available. One is a deluxe sedan panel body and the other an all-steel pick-up body with coupe-type cab. The loading compartment of the panel body is 72 inches long, 46-1/4 inches wide, and 47 inches high. The pick-up body has a loading space 66 inches long and 46-1/4 inches wide. Side panels are 11 inches high with six-inch flare boards.
