Last Call for Crop Loans

Farmers who are contemplating securing a loan from the Crop Production Loan Office should do so at once, according to H. T. Pankey, assistant field inspector for this work, who was in Coquille recently in the interest of the Crop Production Loan Office.

Another meeting of the county committee was held Thursday, April 13, when several applications for loans for local farmers were considered and forwarded to the main office in Minneapolis.

According to a ruling of the United States Department of Agriculture the time for filing these applications will close on April 30; that is, the applications must be mailed in time to be presented at the Crop Production Loan Office in Minneapolis not later than April 30, 1933. To insure arrival within the specified time the applications should be made out not later than April 24 and should be mailed to Minneapolis not later than April 25.

Blank forms for making applications for loans from \$25.00 to \$300.00 may be secured at the Coquille office of the county agent, where other necessary information can be secured and assistance rendered in filling out the applications in accordance with the regulations governing the crop production loan work.

These loans are for the purpose of assisting the farmers to secure seed, spraying and dusting material and fertilizer in producing the 1933 crop.

Now that the system is in full operation applications are going through more promptly, according to Mr. Pankey, and applications filed recently were returned for record with the checks for the growers in the period of ten days, where the applications were correct in all details.

Larger Drunken Driving Fine

Mayor Berg and all councilmen were present for the semi-monthly session of the city dads Monday evening, at which time the Woman's Club was given permission to fit up for use as a tennis court the former Frank Snow lots, now belonging to the city, across Tenth street from the high school and adjacent to the highway. Work was begun on the lots Tuesday.

A \$1000 bond, as a guarantee to repair the paving if it is injured, was requested of Hal Baxter who is hauling \$40,000 feet of cedar to the Hunt Shingle Mill here.

A license to dispense beer was granted to W. H. Fortier for Bill's Place on First street.

The ordinance committee was requested to have prepared a city statute which will require all those selling milk in Coquille to either furnish pasteurized milk or submit a certificate every six months that their stock has been tested and is abortion free.

An amendment to the drunken driver ordinance is also to be presented at the next session, May 1, which will increase the fine for that offense, upon conviction in the recorder's court, from \$25 to \$200.

It was suggested that the water committee make a revision of water rates for the summer, to enable those who have gardens or lawns to use more water for irrigation at a lesser charge than the rate now in force. It is not proposed to reduce the present minimum fee of \$2 which permits the use of 7000 gallons of water, but it is proposed to reduce the 15 cent per thousand rate for water in excess of 7,000 gallons to those who use water for irrigation. The principal reason for the reduction is that Coquille may be kept more green this summer. Last year there was an abundance of water and yet many lawns were neglected and allowed to wither.

The city also expects to have a test case of the ordinance which authorizes the city to hold the property responsible for water delinquencies left by renters.

About Driver's License Exams

Here's a tip for the thrifty motorist!

Drivers licenses will sell for exactly twice the present price after June 9, the fee having been raised to one dollar under the new law which will become effective at that time. Those who get their licenses renewed before June 9 will not only save half the cost but will avoid the last minute rush which is certain to occur, reports Hal E. Hoss, secretary of state.

The new Oregon motor vehicle law provides that all drivers licenses issued prior to July 1, 1931, must expire on September 1, and every two years thereafter, beginning on June 30, 1935. This means that every operator carrying one of the old-type licenses must have it renewed before September and because there are some 400,000 drivers affected by the law, the department will be flooded with applications as the dead-line approaches.

"Persons desiring to renew their operators cards before June 9 should secure an examiners schedule and an Oregon Motorist's Manual," advises Secretary Hoss. "These may be obtained from state police, newspapers, or by writing to my office. No one should attempt to take the examination without first having carefully studied the information contained in the manual," Mr. Hoss adds.

Airbrake's Inventor

The airbrake was invented by George Westinghouse, Jr., in 1869. This was known as the straight airbrake. Objections to this led him to invent in 1873 the automatic airbrake. In 1887 he invented the quick-action triple-valve brake, and in 1897 he placed on the market the high-speed brake.

Watermelon's Origin

The watermelon is a separate and distinct species of the cucumber family, which has been grown in this country for a great many years, but which is supposed to have originated in a wild state in Africa.

Effect of Praise

Praise has different effects, according to the mind it meets with: it makes a wise man modest, but a fool more arrogant, turning his weak brain giddy.—Fetham.
