

"Believe me, I know a low price when I see one—"

I'm buying my tires NOW!"

Right now Goodyear is concentrating on two main lines of tires . . . This saves money for the factory that builds them — for the dealer who sells them — and for the car owner who buys them . . . If you want to know how real these savings are — and how much they mean to you — just check up on today's price of the size you need, and at the same time take a careful look at the finest quality that ever honored the Goodyear name . . . This stepping up of quality, this stepping down of price leads the way to a better deal for everyone — and that's what we all want now . . . Best of all — it means that everyone can afford new Goodyear Tires, especially if you buy now while prices are still low.
