

MORE SAFETY MORE MILEAGE

ONE of the strange facts about the tire business is—the PRICE of all tires is about alike. That being so, you might as well pick the best—in quality, in safety, in mileage.

What's the best in quality? The public says Goodyear—this tire is preferred by more people than any THREE other makes of tires.

What's the best in safety? Accurate tests on wet concrete show Goodyears will stop a car quicker than any other tire. The next best tire skidded 10% more—other tires skidded up to 77% more under exactly the same conditions. And if you want safety from blowouts—remember that Goodyears give safety in every ply, because every ply is built with Supertwist cord and every ply runs from bead to bead.

What's the best in mileage? Bus fleet records show Goodyear Tires give 97% more mileage than they gave five years ago.

Now that all prices are headed UP—it's more important than ever to get the most for your money. Better look over your tires and buy new Goodyears now while prices are still low.
