CHEVROLET ANNOUNCES
a revolutionary new line of low-priced trucks

Bigger, huskier models feature an entirely new engine, giving increased power on less fuel than ever!

THE 1934 line of Chevrolet trucks—truck built for truck service all the way through—feature the *Blue-Flame engine*—a great new development that will be welcomed by every truck buyer in America. Here are the remarkable facts: The new Chevrolet trucks are even bigger than last year's models—bigger in bodies, with stronger, heavier frames, huskier transmissions and rear axles, and larger brakes. They will deliver more power. They will haul bigger loads than ever. Yet, thanks to the new Blue-Flame engine, operating costs are actually lower than before—and that means the lowest in the hauling field. The net result of all these improvements is a line of trucks like no others on the market—the first to offer such a combination of big capacity, great power and unequalled economy.
