### OUT-OF-DOORS STUFF

By Lans Leneve

In April the census of wild animals was given for the Siskiyou National Forest. This data was collected by forest rangers and other officials so stated the press dispatch. The enumeration showed among other animals, that the above mentioned forest contained 275 coyotes, 655 bobcats and 158 cougar, and that said forest also harbored 11,250 deer.

I have raved about this wild animal census-taking in the past and sought to show how utterly impossible it is to enumerate wild life in general. And here and now I am going to prove—actually prove by figures how utterly absurd this census business is. Here goes: We will take the officials' own figures for the Siskiyou National Forest of there being 168 cougar in that region. It is a known and proven fact that a cougar kills at least two deer each week. All right. Now these 168 cougar have 11,250 deer on which to feed in the Siskiyou forest. Each cougar killing his allotted number of two a week would destroy in one month 1,254 deer. That is, the 168 cougar would destroy the 1,254 deer per month. And at the rate of two deer per week the 268 cougar would destroy 13,168 deer in a year—exactly, according to the census 3,918 more deer than there actually are in the forest.

Perhaps some one will remark as to how about the fawns that are born during the year? The 275 coyotes and 655 bobcats would easily dispose of them—thus leaving the Siskiyou Forest without a deer. Fact of the matter, bobcats and coyotes destroy larger deer than mere fawns and that is naturally going to cut down on the cougar's supply of food. So coming right down to brass tacks, according to the census takers' figures on wild life in the Siskiyou Forest, at the end of a year all the deer will be devoured and the poor cougar, bobcats and coyotes will starve to death from lack of nourishment. Of course, they could move over into other forests, but census figures show that the same number, in proportion, of predators exist there, just as they do in the national forests. And so, by the figures furnished us by officials, forest rangers, etc., there can only be one end to it, if we are to take their figures seriously and that is, that every deer within the state will be slain by predators within a year. I suppose then, with cougars deprived of their natural food that they will then turn to the food of lesser animals. This will mean that practically all the fur-bearing animals as well as bobcats and coyotes being deprived of their food will cease to exist and that within a short while all the cougars will starve to death for lack of nourishment. Thus will our forests be devoid of predators as well as deer.

When I think of such nonsense I actually don't know whether to get mad or laugh. The very figures issued in these crazy census figures disprove themselves, they do not have to be disproved, as in the case of the cougar and the deer. As I have demonstrated by the above, there wouldn't be a deer left in the Siskiyou Forest within a year if we are to take the enumeration figures of wild life seriously. What I am wondering, is just how long is the public at large going to be flimflammed into believing such crude stuff as put out by forest officials regarding wildlife. It's silly, preposterous.

If you happen not to be convinced after what I have just stated, then let's take the enumeration of fisher in the Siskiyou Forest. It was stated that it contained 38 of these animals. The fisher, in this state, is a rare animal today; in fact the rarest of fur-bearers. It is an animal that is seldom glimpsed in the woods and I would not be afraid to wager that nine out of every ten men in the forestry service would not actually know a fisher track if they saw one—that

they would not distinguish it from the track of other animals. And one thing is a dead mortal cinch and that is that all the forest officials in the United States turned loose in the Siskiyou Forest would not see 38 fisher in 38 years, so what I want to know is how they enumerated 38 fisher?

A good demonstration to get the real low down on this census business is to ask a dozen woodsmen consisting of timber cruisers, trappers, loggers and hunters how many cougar, bear or bobcats that they figure abound in a certain stretch of country. If they happen to be foolish enough to commit themselves on the subject you will be surprised at their different ideas as to the respective numbers of the animals listed. There will be a difference of hundreds between some of their guesses. For guess work is all it is, whether the enumeration is taken by forest officials, game wardens or whoever it may be. And if woodsmen who have hunted and cruised about the woods all their lives cannot even start to agree upon the subject or are too smart to even think of guessing concerning it, just why should these super intelligent official enumerators who work on a salary be able to tell the exact number of all animals which our forests contain? But every now and then they pull real big boners, as in the case of the cougar and the deer in the Siskiyou National Forest.

Last duck season there were 504,000 duck stamps sold in the United States. Over a half million. And yet, when the fact is considered that there are seven million hunters in the United States it naturally sets us wondering just how come that only 540,000 stamps were sold. As early as 1923 there were 7,000,000 licensed hunters and that number has no doubt increased to date. What's the answer? It looks to me as though there were a lot of hunters gunning for ducks who never purchased a duck stamp, for surely over 6,000,000 would not lay off of hunting altogether just on account of the extra dollar it cost for the purchase of the stamp.

The new law regarding the three-shell limit for shotguns to be used in duck shooting does not seem to be clear to lots of hunters as I hear discussions upon it every now and then. Many times I have heard the question asked, "Are you allowed three shells in the magazine of your gun?" And, "If so, then one in the barrel will give you four shots altogether." The answer to this is that you all allowed three shells in your gun and three only. Therefore your magazine must be blocked or cut down so that it will only hold two shells. The two in the magazine and the one in the barrel make your three-shell limit. It is well to bear this fact in mind when having your gun fixed up to the requirements of the new law.

The three-shell limit applies only to waterfowl and not to other bird shooting such as Chinese pheasants, grouse, etc.

So far this spring anglers have found that fishing has not been up to par with past seasons. Fewer catches have been made this season than for many seasons past in the various mountain streams. The main Coquille river, in tide water, has furnished good fishing, and cat fish and shiner fishing are both excellent. One thing noticeable is the scarcity of large trout in the various streams, especially the north fork of the Coquille. To my knowledge few trout have been taken over ten inches in length in that stream. It used to be no trick at all to catch the limit of trout ranging from six to 16 inches in length, but just try and do it now. It is a safe bet that at least two thousand fishermen have cast in the north fork to date, this season. The fish are going the same route as game birds and animals. When there are more fishermen than fish, just what chance does the poor fish really stand?

### Junior Leaguers Play a Great Game Here Last Sunday

Two fast-playing Junior League teams, one from Roseburg and the other the Coquille American Legion sponsored club, more than substituted for the Loggers as Sunday afternoon's baseball attraction for fans when pitchers, Bill Scherner and Ralph Willson, engaged in a tight pitching duel which ended, 2 to 0, with Scherner, the visiting hurler, gaining the edge.

The two youngsters, backed by fighting mates, used a complete assortment of moundman's slants. Willson was defeated when Baker as first up in the second frame belted out a home run which proved to be the winning margin. Another score came in during the eighth inning but misplays combined with two hits to give the Douglas county team a gift counter.

The one excellent chance for Coquille runs came in the seventh. In this canto Burr, as first up, reached first on a boot. Schær bunted perfectly down the first base line for a single, but on the play Burr was out trying to reach third base. Schær stole second, but with Jim crying for a chance to score Schærner put on the steam to whiff Barton and Moore.

The game was an exhibition affair and does not hinder the local Junior team's opportunities in state play. The elimination series start after June 30. Coach "Penny" Sturdivant and Carl Gilbert have a grand, little aggregation that may go places, though some strengthening may be necessary. Lineups:

Coquille	B	R	H	O	A	E
Oderkirk, 2b	4	0	0	2	1	0
Burr, lf	3	0	0	0	0	0
Schær, 3b	3	0	2	1	3	0
Barton, 1b	3	0	0	10	0	1

Miller, rf	1	0	0	0	0	0

33 2 6 28 8 1

Summary—Earned runs, Roseburg 2; home run, Baker; stolen base, Scherner, Baker, Schær; bases on balls, Willson 2; struck out, Willson 9, Schærner 11; time of game, 1 hr., 40 minutes.

### Loggers Win From C. C.

Again the Crescent City Knights fell as a victim before the onslaught of the Coquille Loggers, as, for the second straight time this season and on successive Sundays, the aggregation manned by the athletes of our town defeated the southern city's club, 9 to 3, in California last Sunday.

Nothing daunted the Knights and Mr. "Happy" Koskela will attempt in a third try to gain the nod. Despite two defeats Crescent City will be here this week-end and Koskela and his tents are going to throw every offensive weapon at "Cocky" Brewer.

A righthander, Deo by name, started against Coquille last Sunday, but Deo didn't last long, leaving the fray during the second inning assault launched by the Loggers. "Happy" Koskela relieved him after two runs were in and Hal Sowers immediately greeted the southpaw with a single which drove in a third run. "Happy" then got Moran on a pop out to quell the damage.

Coquille's initial start came in the opening frame, however, when the first three runs crossed the plate. These, coupled with the trio of scores in the second, were more than enough to win, but in the sixth, seventh and eighth Koskela was reached for lone tallies in each frame.

The Californians got one score in the third inning and two in the fifth, but as a rule during the contest Brewer had the opposing clubbers at his mercy or else his fielders, particularly the fleet Sowers, gave him capable backing despite the boots chalked up against them in the score columns. Lineups:

Coquille	B	R	H	O	A	E
Woodyard, ss	4	2	2	0	0	1

34 3 7 27 6 8

Summary—Earned runs, Coquille 4, Crescent City 2; three base hit, Woodyard; two base hits, Woodyard, Kolstad, Spann, Koskela; stolen base, Moran; hit by pitcher, Pera; passed balls, Bowman 1, Moran 1; first base on errors, Coquille 5, Crescent City 4; innings pitched, by Deo 1 1/2, by Koskela 7 1/2; bases on balls, off Deo 2, off Koskela 1, off Brewer 2; struck out, by Deo 3, by Koskela 7, by Brewer 9; losing pitcher, Deo.

### UNDER THE BLEACHERS

By Mark Seeley

So it is said, though our word mustn't be taken as authentic, as the information is second hand, that if President "Count" Lawrence, executive head of the Coquille Loggers, hadn't been on the job at Crescent City last Sunday the local aggregation would have had a "sleeping beauty" on the bench. Mark we well again, it's second hand, but we hear that Bill Fortier was found to be dozing on the bench when his team took the second straight game from the Californians. The question is: Can Bill be getting the "ego" because of the Loggers' continued success?

Maybe if Bill sleeps this Sunday and if President Lawrence isn't around, Crescent City will catch the Loggers napping. One thing sure is, if the Loggers don't attend more strictly to practice nights, they will be caught napping sooner or later, regardless of other influences. The team this season is a good one, what with "Cocky" Brewer holding up the pitching department and several of the boys hitting the ball extremely hard, Brewer, Perry Roper, Otto Kolstad, and Hal Sowers all having marks above 400, but with a heavy future campaign coming up the best is to be expected. One game, for instance—the one at Bandon on July 4 with the Marshfield Eagles—is to be played on the winner take all basis.

Two absentees are listed on Loggers' roster. One is Bill Stewart and the other Mel Duncan, Bill having departed from Coquille and the team and the other half of the Duncan combination, which started the season here, having been released. Bill may be back but other climes beckoned him so he went.

Mel has had a tough time of it this season and, regardless of his showing, it can clearly be seen that the southpaw has and can play in better than the average bush league circles. His hitting average has been low, but many a hard blow lined out by his bat went directly at fielders. Manager Fortier was forced to reduce the roster and Mel Duncan had to be the one to go.

The departure of Stewart, who has held down the short patch since 1928, left a wide, gaping hole in the infield. Cliff "Chief" McLean, great Indian athlete, may already be on hand to fill the spot, but if he doesn't report Fortier will send entreaties elsewhere.

Tommy Hawkins, absolutely a novice at infield play, was shoved into the infield last Sunday, but with the campaign getting hotter a more experienced inner defense man will be needed. A man of McLean's ability, the former all-state basketball star can also catch and pitch, would be a handy addition to have around. He's a hard hitter, also.

When the American Legion Junior League series get under way it's a cinch that Coquille will be watching the local team. The game with Roseburg last Sunday exhibited partially what the Coquille youngsters can do and after the campaign starts and the full strength is on hand even greater things are expected.

Defensively the team is tight, but as an entire aggregation the offensive power isn't so strong. However, it's a well balanced Junior team in Coquille.

The whereabouts of another ex-Logger has been discovered. Eddie Foss, second baseman in 1929, is playing for Linnton in the Northwest League, a Portland bush circuit. Sunday, Eddie blasted out a homer, a double, and a single in four bat appearances, but even such heroic single-handed efforts were not enough to give Linnton a win.

### Taukanso Club Notes

A very enjoyable evening was spent by the members of the Taukanso Club and invited guests on June 13th at the home of Mrs. Wm. Ferbrache. Two tables of cards were in play, while others enjoyed sewing until a late hour when delicious refreshments were served to the following: Mesdames Robt. Wheeler, Ernest Johnson, M. Morrott, Geo. Burr, Al Burch, R. Robison, M. D. Sheppard, Robt. Waggoner, Ella Sheehan, Grace Sheehan, Henry Belloni, Clarence Hurrell and the Misses Faye Hurrell and Jane Ferbrache and the hostess, Mrs. Ferbrache.

Calling cards, 50 for \$1.00.

### The Zodiac Club

Mrs. Edna Kern entertained at her home on June 12 the Zodiac club. The afternoon was spent in club activities, after which a lovely desert luncheon was served to Mesdames Ora Tennant, Blanche Mast, Virginia Kolstad, Bonnie Green, Constance Pownder, Dorothy Custer, Ethel Fuller, Robah Robison and Gledys Wheeler. The club members presented their hostess with a beautiful birthday gift. The next meeting will be on July 18 at the home of Mrs. Myrtle Benham.

### Camp Fire Girls Notes

The Aowakiya Camp Fire Group will meet at Jeannette Wheeler's home on Tuesday, June 25, at which time they will study requirements for their Fire Markers' rank. Mrs. Robt. Wheeler will act as group guardian in the absence of Mrs. C. W. Gene.

Watch Real Silk adv. in next week's Sentinel for details of gift to be given each housewife called upon by B. C. Jeffrey, Real Silk hosiery representative.
