"The Strange Bequest," played by juniors and seniors, was presented Friday evening to a fair crowd. Illness and stormy weather accounted for fewer than usually attend the school plays. A visitor from Riverton saw the play and asked them to put it on in Riverton. On Monday arrangements were made to present it in the Riverton gymnasium, April 10. Miss Katherine Howard, of Langlois, read "Aunt Tabitha" by Oliver Wendell Holmes in the first intermission. Miss Alice Howard read "Little Gentleman" from "Penrod" by Booth Tarkington during the second intermission. These readings were a special treat to the Arago folks and were highly appreciated. A Sanitation Report

The Coos county sanitation project has installed 35 sanitary pit-type toilets in Coos county in the last six weeks. These installations are scattered over the central part of the county, from below Myrtle Point to Haynes Inlet across the Bay.

These units are being constructed at present at the old county barn in Coquille and at the Ocean Dock Terminal & Supply Company yard in Marshfield. Nine men are employed at the Coquille location and six at Marshfield. These men are from the relief rolls of Coquille and Marshfield respectively. Additional men will be added this coming month to this rapidly growing project.

It has taken a lot of hard work to get this project under way and it has been a pleasure to work hard on a project that means so much to the health and welfare of the several communities in which we have worked. The interest shown by the many who have inspected our work is very gratifying to the sponsors and men on the job.

The type of construction is modern and the cost very small when the facts are understood. The purchaser pays only the cost of the materials, all labor and supervision being paid by the WPA set-up. This includes labor in building, hauling to location, digging pit and installing the unit in an up-to-date method.

The cost of these units range from \$17.50 to \$20.00 for single units and approximately \$10.00 added for double units. Larger units necessarily have to be constructed on the location and each carefully estimated for that location.

In Coquille, E. W. Gregg furnishes the materials for units constructed and installed from the old county barn. In Marshfield, the Ocean Dock Terminal & Supply Co. furnishes the materials for our Marshfield crew.

This project is sponsored by the Oregon State Board of Health, in cooperation with the U. S. Public Health Service, and should be of vital interest to every citizen of Coos county.
