

MINOR MENTION

Telling About People and Events in the City and County

Mr. and Mrs. W. E. Marrion left Monday afternoon on a business trip to Portland.

Ideal Bakery bread is slow baked. 51ft

Mr. and Mrs. F. L. Greenough are leaving this afternoon on a holiday trip to Astoria, Portland and Corvallis.

Mrs. F. C. Hudson left Wednesday for an extended visit in Minnesota and Wisconsin, where a number of her relatives reside.

If you want to subscribe for a Portland daily the clubbing combination we offer with the Sentinel will save you money.

Mrs. W. V. Glaisyer came in from Klamath Falls Wednesday evening, leaving again today on official business connected with the O. E. S.

Ask Ned C. Kelley for rates on Fire Insurance.

Mr. and Mrs. Harry Hart, of Medford, brother-in-law and sister of Mrs. J. A. Lamb, were week-end visitors here and attended the bridge ceremonies at Florence.

Drink Stillicious—the vitamin B Chocolate health drink. Contains yeast, Cloverleaf Dairy, Pure Milk & Cream. Phone 7R42. 17ft

Ward McReynolds will be at the Coquille city hall again next Wednesday, June 3, from 8 a. m. to 5 p. m., to conduct examinations of applicants for drivers' licenses.

Keys made for all locks. Stevens Cash Hardware, Coquille, Ore.

A baby boy who has been named Ralph Lane, Jr., was born to Mr. and Mrs. R. L. Walker at the Coquille Hospital last Friday. The young man weighed nearly eight pounds.

Mr. and Mrs. P. W. Lane expect to leave tomorrow morning for an eight or ten weeks' stay in southern California where he expects to take a summer course at one of the universities there.

Investigate Pacific Mutual Non-Cancellable sick and accident insurance A. A. Nosler, Jr., Call 147-J.

The Business and Professional Women's Club will meet next Monday evening, June 1, at 6:30 p. m. at the home of Georgia Richmond for a potluck dinner. Each member is asked to bring a dish.

A. L. Hooton, electrical contractor and dealer, 274 Second street, Coquille.

Frederick A. Fuhrman, of Coquille, junior in pharmacy at Oregon State college, was awarded the Rho Chi prize last week. The prize consists of membership in the American Pharmaceutical association.

Calling cards, 50 for \$1.00.

The dance given by the Coquille Woman's Club was fairly well attended at the Community Building last Saturday evening. While the club treasury did not benefit as had been hoped, the receipts paid all expenses.

V. R. WILSON, O. D. OPTOMETRIST
Errors in refraction scientifically corrected without the use of drugs. Coquille, Oregon.

Dr. Ralph F. Milne has his office for the practice of dentistry, in the First National Bank building here, open now. He expects to spend Saturday each week in his office at Powers, and the other five days in the Coquille office.

Ask for Cow Bell Dairy cream and milk, the only milk and cream made safe by pasteurization.

Mrs. K. P. Lawrence and sons intend leaving tomorrow for a month's visit at their old home in Oakland, Calif. Kennett, Jr., who is an accordion player of considerable promise, will devote a part of his vacation there to taking lessons on the instrument.

50 and 25 watt 32-volt Lamps for country lighting plants, now at Iooton Electric Shop.

Mr. and Mrs. James, who left Coquille 17 years ago, have returned to his section, and have purchased the Radabaugh place, just above the Norway school house on the Norway-Lee road. Mr. James has been up here for some months, but went down to Watsonville, Calif., the fore part of May and returned with Mrs. James a couple of weeks ago.

Ask about Pacific Mutual 5 way Policy. A. A. Nosler, Jr., 147-J.

Mrs. J. E. Norton and Beverly, daughter of Mr. and Mrs. H. S. Norton, left Wednesday morning for The Dalles, where Mrs. Norton will attend the state convention of Federated Woman's Clubs. From there they will go to Boise, Idaho, Mrs. Norton's former home, where her mother and brother reside. They expect to be gone about ten days.

Insure your car with Ned C. Kelley in a reliable Oregon stock company.

Mr. and Mrs. H. S. Cadman were in Coquille Monday from their ranch near Langlois. They come to Coquille once a month to greet old friends and purchase supplies. Although he is out of this district now, "Caddy" still retains a live interest in C.-H. S. athletics, for which he has been the most consistent rooster for years, and in the Loggers' baseball games.

Buy Ideal Bakery bread because it is better. 51ft

George E. Oerding and wife, recently married in Portland, returned to Coquille Tuesday evening after an extended trip into points of Oregon, Washington and British Columbia. While in Portland Mr. Oerding attended a short convention of the Union Central Life Insurance Co., of which he is district manager here, and in the future will spend a portion of his time in Portland, handling insurance business there.

Body and Fender repair work done by experienced mechanics. Our body painter is an expert. Let us prove we have the best of repair service. Southwestern Motor Co. 11ft

Mr. and Mrs. L. H. Hazard returned Monday evening from their two weeks' vacation trip. They went first to Richardson's Springs, near Chico, Calif., and after a week there drove up to Klamath Falls where they spent a couple of days with Rev. and Mrs. Hale B. Eubanks. On a trip to Crater Lake they encountered a snow storm and found about twelve feet of snow at the rim, although the road in had been cleared. From there they went up to Portland and spent a couple of days with Mr. and Mrs. Jack Sercombe.

For Rent—Six-room house at 390 S. Collier. Phone 1-J or 152-L.

About a Coquille Industry

At the Coquille Chamber of Commerce meeting in the hotel Tuesday noon, Geo. D. Holbrook, local manager of the Western Condensing Co., stated that the plant here was receiving about 150,000 pounds of whey daily, and that they could use more. In cash the company is distributing to the dairymen about \$2000 a month.

In this connection the Sentinel quotes from yesterday's special Coos Bay bridge number of the North Bend Harbor extracts from its write-up of the whey plant here:

Dairying in the Coquille district is one of our major industries. Large quantities of Cheddar or American cheese are manufactured annually in this community. In the production of this cheese from whole milk, a large quantity of whey, equal in weight to about 85 per cent of the milk, is produced as a by-product. Whey is 94 per cent water and 6 per cent solids. Of these solids about 75 per cent is milk sugar and the remaining 30 per cent consists of milk minerals and albumin.

Through most of the United States whey has been a waste product for years and has been allowed to run into rivers or sewers, or used as hog feed. As the quantity of whey has increased in populous centers its disposal has become a problem of great importance. When allowed to run into rivers it results in harm to the fish and very often creates a nuisance because of the odors which develop.

Its use as a food for hogs is economically questionable unless it is fed as a supplement to a grain ration. In localities such as Iowa where plenty of locally grown grain is available, the whey forms a very excellent additive to the diet of the animal. In places where grain has to be shipped in, it is not economically sound to feed whey to hogs.

Owing to the fact that the whey contains such large quantities of water, and that this water can only be removed by the use of heat, it has been difficult to develop uses for the solid constituents in the whey which would return a fair price for the raw material.

Several months ago the Western Condensing Co. began a survey in the Coquille area which resulted in their decision to erect a plant. They purchased the old Nestle's building, together with additional adjoining property, added to the building, and have installed their equipment.

Total investment in this territory will probably run around \$35,000 or \$40,000, and this enterprise is indeed a valuable addition to the industrial activity here since it will return to the dairymen considerable money for their whey. A number of men will be employed and money will be spent for steam, power and supplies.

In carrying out this process the liquid whey is hauled to the plant in tank trucks and then concentrated in a specially designed evaporator to about 35 per cent solids. It is then further concentrated in another piece of equipment and finally passed into a spray dryer where the concentrated liquid is contacted with warm air. This drives off the remaining water without injury to the solid content and results in the production of a fine white powder of pleasant taste and appearance. This product is sold in 100 pound sacks. It contains vitamin G which prevents pellegra, increases the rate of growth of chickens and hatchability of eggs.

HOME FOLKS

Uncle Sam's Attic

Isn't it fun to browse around in attics unearthing old treasures and digging for new? Come with me and let's go up into Uncle Sam's Attic. Half of us do not really know what's up there or what's already been carried out!

Alaska has many nick-names, Seward's Folly, Seward's Ice-Box, Little Orphan Annie and Cinderella. But I think the best is Uncle Sam's Attic. And what an attic it is—lying there high above our forty-eight proud rooms.

You will remember when Secretary Seward bought Alaska from Russia in 1867, for \$7,200,000 that he was severely criticized. People, then, could visualize no wealth there, but only looked upon it as a frozen peak! It is interesting to compare the following figures with the purchase price. Seven hundred million has been taken out in gold. One billion in salmon, and one hundred million in furs. Besides this, forty million is realized each year in salmon and ten million in gold.

Alaska is larger than Ireland, Scotland, England, Norway, Sweden, Denmark and Finland combined—or six times larger than the state of Oregon. And yet the population of Portland is five times greater than the whole of Alaska, the latter having only 60,000 inhabitants.

It's hard to believe that in so vast a domain that there are only 1,628 miles of wagon road, 88 grade schools and 15 high schools. But now, with Alaska's 72 landing fields, airplanes are rapidly making it a promised land.

There are so many places we'll want to visit in Alaska. Paramount in majestic and unusual beauty is Glacier Bay which became a national monument in 1930. In it are 1,820 square miles of glaciers. A tremendous sight of amazing beauty.

Let's visit Mt. McKinley, too, rising in snow-capped majesty more than 20,460 feet, the highest peak in North America, and higher by 2,000 feet than any peak in the Alps. The first person to reach its summit was Hudson Stuck in 1913. Around this mighty mountain lie 3,000 square miles of forests, a vast unknown wilderness, which is a national park and a game preserve. Here a temperature of 95 degrees below has been reached.

Sprinkled over the whole of Alaska are twenty active volcanoes, and we gaze with interest toward the Aleutian Islands, extending for 1,000 miles southeast of the mainland, in a stretch of seventy trellis, desolate, volcanic islands.

Many people still think Dawson and the Klondike are in Alaska, but we find them just over the border in Canada.

We marvel at the grain raising close to the Arctic Circle, with big yields near Fairbanks. This has been a most interesting, if not, daring experiment. The ground there is frozen to unknown depths, but the snow can be scraped off, then the ground thaws. It can then be planted. The largest yields have been 41 bushels of spring wheat on an acre and 79 bushels of oats to an acre.

Alaska barley had its origin in the Himalaya mountains at a height of 11,000 feet. It took years of skilled and patient cross fertilization to perfect Alaskan barley. It has five inch beardless heads and is the earliest maturing of the world. The reason for the rapid growth of these grains is attributed to the long days of sunshine of almost 24 hours when the ground never thaws.

Did you know that it took eight years to perfect an apple that would ripen in Alaska? And did you know that Alaskan strawberries are sought in Seattle markets, because of their superior flavor?

There is such a vast amount of interest concerning farms, cattle raising and fine vegetables, but that must come another time. I am sure you will be interested in the "Plant Wizard" of Alaska and the fascinating dog races of Nome.

Alaska is a great vacation-land. When you go, don't fly in but take the boat at Seattle and enjoy the Long Gaeway of 1,000 miles, a four-day trip. Beauty on so vast a scale as to be almost incomprehensible, thrills upon thrills!

A man, who is a travel authority, says, "If you are old, by all means see Alaska at once, but if you are young see the rest of the world first!" Till we meet again.

Elizabeth Gormley

Knife Hospital

Mrs. B. C. Jeffries and baby were dismissed last Friday and returned to their home at Bullards.

Mrs. L. E. Teagarden, of Fairview, was admitted to the hospital on Monday for treatment.

Miss Dorothy Jeffries, who has been from Nebraska visiting her brother, B. C. Jeffries, underwent an operation for appendicitis on Monday.

Mrs. Lola Olson was admitted to the hospital on Monday for treatment, and on Wednesday Antone Abild, of Arago, was received for treatment for heart trouble.

Beauty Contest

So many women possess that breath-taking charm of bright eyes, rosy cheeks and luxurious hair, that life today is a veritable beauty contest! Dull eyes, sallow skin and drab hair are the results of internal disorders and can be easily corrected by your physician. See him and take your rightful place among the ranks of loveliness!

Farm Loan Ass'n Activity

Geo. Dunning, representative of the Federal Land Bank of Spokane was a Coquille visitor yesterday to meet with E. J. Tilly, secretary of the Coquille Farm Loan Association and members of the association.

Mr. Dunning declared that the land bank is endeavoring to eliminate all the travelling collection agencies of the bank and its travelling representatives, leaving the handling of loan association affairs entirely in local hands. In Oregon there are 2,317 farmers who have an ownership investment in the land bank of \$1,823,932.

Foreclosing for failure to meet payments due the bank are becoming very scarce in Oregon, and it is the policy of the bank to make any reasonable terms rather than foreclose if the mortgagee makes the slightest effort to meet his obligations.

Army Recruiting at Medford

The U. S. army recruiting station, city hall, Medford, Oregon, now has a wide variety of vacancies to offer the young men of southern Oregon. According to Sergeant Hill, recruiting officer, there is the opportunity to travel to the Hawaiian Islands, also to many posts in the Pacific northwest. Those choosing Hawaii only stay in the islands two years after which they are returned to the United States.

Sergeant Hill says each have an equal chance to learn a trade or finish their education and get paid while learning.

A postal card to the above address will bring full information promptly. Only men of good character can be accepted for enlistment in the United States Army.

New Manager Freight Line

Phil McManamy arrived here yesterday from Portland to take the position of the local agent for the Consolidated Truck Lines. Fred P. King, who has been agent here for several months, has been transferred to Great Falls, Mont., and with his family left for there yesterday.

Neighbors of Woodcraft!

The Neighbors of Woodcraft will meet June 1st. After regular lodge meeting a pie social and program will be given for all members and their families. Each member is asked to bring a pie.—Committee.

"Palace" Street Cars
A curious luxury of old New York was the "Palace" street cars which ran on the Bowery in the 1870s. They had fancy upholstered arm-chairs, rugs and plush curtains and, despite the fare of 20 cents, they were always well patronized by the "stylish boys and girls."—Collier's Weekly.
