

Come to Church

ON SUNDAY

At Pioneer Church Sunday
 Sunday begins with the Sunday School meeting at ten o'clock, in which those of all ages are privileged to enjoy classes in Bible instruction under consecrated teachers.
 The morning worship service at eleven o'clock affords an hour of worshipful devotion with music by the Pioneer Church choir and vocal soloists. The pastor, Rev. W. Raymond Wilder, will preach upon the theme, "The Starvation Committee," a personal and timely message.
 The evening begins with the Epworth League meeting at six thirty, presenting a helpful and interesting hour of study and discussion for all the young people. Immediately following, the evening evangelistic service brings an intimate inspirational message by the pastor upon the theme, "Scarecrows." Special music will be featured in this service by the choir and others.
 The public is cordially invited to enjoy these and the mid-week service on Wednesday evening at seven thirty.

Time to Fill Out Work Sheets Under AAA Program
 (Continued from Page One)

26 and 27.
 Bandon in the American Legion hall, February 25 and 26, and March 1, 2, and 3.
 Many farmers in the county failed to fill out work sheets who earned substantial payments last year, according to committeemen and this schedule is being carried out at this time in order to provide an opportunity for all farmers in the county to prepare the work sheets so as to be eligible to receive any payments earned.
 Payments are made for a large number of soil building practices, including the seeding of perennial legumes, biennial legumes, perennial grasses, mixtures of perennial and biennial legumes and perennial grasses, reseeding farm pastures and meadows, plowing under green manure crops, perennial noxious weed control, applying superphosphate, liming the soil, and other practices which may not apply in this section.
 It is possible, local committeemen believe, for a farmer to receive greater benefits under the 1937 program than during previous years. Where payments for liming soil amounted to \$2.50 per acre last year, the allowance for this practice will be \$3 per ton during 1937. The payments for seeding are also greater.
 It will not be necessary for those who filed a work-sheet last year to file another work sheet at this time unless there has been a change in the number of acres farmed by him this year or unless for some reason he feels that the acreages listed for him last year were not correct. The county committee may also make adjustments in the 1936 work sheets where errors have been found. It is suggested that all farmers who are not certain that work sheets have been filed, contact those who are filling out work sheets at one of the points mentioned during this next week.

That's OUR Baby

When we knew a baby was coming to our home, we decided we simply must have an automatic hot water heater without further delay, and we have never regretted this decision for a moment. We had put it off because we thought it would be expensive. Actually it has cost us very little more, especially when you consider that we have saved at least 20% of our fuel bill by not having the water coils in the furnace. But even if it cost twice as much as it does we wouldn't think of trying to get along without it. Just look at our baby! Isn't he healthy? Each day at nine in the morning, he is put into his tub and splashes to his heart's content, in the warm cleansing water. Through the day hot water keeps his hands and face clean and germ-free, even though he is now at the creeping age. What a marvelous convenience it is to have hot water always ready, day or night for every household use.
