FAST ACTION'S IN ORDER HERE!

IT'S no time now to dawdle around—
Mrs. August, summer's dying, that car of yours is going down steadily in trade-in value—and the Buicks are moving plenty fast!

Right now this big, silky, fast-stepping, valve-in-head straight-eight is still selling at the lowest prices in Buick history.

It's still your big chance to get a man-size bundle of thrill-packed travel-power at rock-bottom bargain rates. You can still have one for less than some sixes cost—and it's so far out in front of the others that no matter what they do next, they won't be able to match the '37 Buick for value!

So go slip your frame behind a Buick's ready wheel and head its nose out toward the highway. Try out its great power with your gas-treadle toe, give yourself over to it and let it show how it can send your spirits soaring.

And when you've sampled its mettle and learned the modest price figures, just ask yourself if it's likely that we'll soon see such value again! Yes, sir, it's a buy—the buy—just too good a buy to let slip.

So get busy—right now! Fast action is in order! Give us a ring and we'll talk things over!

"It's Buick again!"

IN THE GOOD OLD SUMMERTIME

...and all year round, 4 miles out of 5 are Stop and Go

SHIFTING through gears after only one stop can waste enough gasoline to take you a third of a mile!

To cut down the high cost of stop and go, Shell engineers have developed a way to "balance" gasoline. This balancing process, by rearranging its chemical structure, makes Super-Shell "digestible"

for your motor, just as cooking makes food digestible for you.

Your motor, at all times, gets the full benefit of Super-Shell's high energy content, and you get the savings!

For economy's sake try this "motor-digestible" gasoline. There is a Shell dealer in your neighborhood.
