WARNING!
 It is poor economy to use cheap paint or to apply good paint carelessly when consideration is given to the fact that the greater expense of any paint job is not the original cost of the paint but the cost of applications there. When cheap paint is used or good paint poorly applied, the paint not only fails to give proper protection but the wall necessitates repainting at frequent intervals with attendant labor as well as material costs.
 100% PURE PAINT
 So if you want a paint that does a job economically and well—and that will withstand wear and weather—USE GENERAL PAINT 100% PURE PAINT.
 General 100% Pure Paints HAVE to be good. Only the best houses, schools, oils and drives are used. There are no cheap fillers or adulterants used.
