

"ORPHANS OF THE STORM"

Fleeing a tornado near Clyde, Texas, parents of these babies were killed, their automobile tossed a quarter-mile away. Hours later a telephone lineman heard a child's whimper in a roadside ditch. There he found 3-year-old Jesse Donald Rutledge, water up to his chin, holding his 2-month-old brother Daryl's head above water. Relatives being unable to care for the orphans, Red Cross workers arranged a maintenance fund to support them until they are 18. A Texas college promised scholarships and ranchmen started a herd of cattle for their benefit. The Red Cross will help the boys make adjustments as they grow older.

'Pleased to Meetcha' Another Fine Show By C.H.S. Students

Tuesday evening's presentation of "Pleased to Meetcha" by the Coquille high school junior class was no exception to the rule of many years—that the cast of any play given by C. H. S. students is always well rehearsed and that the students give a most creditable performance.

This year's junior play was coached and directed by Miss Rose Naef with Harold Cole as assistant and the presentation to them of gifts by the cast was a well-earned tribute to their untiring efforts.

Gretchen Clinton, as the daughter of the newly-rich house of Bixby, was as natural and at home in her role as a professional, possibly because being a young lady is her daily life. Jeanne Claterbos, her mother, did extremely well in the difficult part to a young girl—of being a nagging and match-making mother.

Danny Cardwell, as father Bixby, was more or less hen-pecked, but he, too, showed the effects of the directors' untiring efforts.

The other members of the cast did equally as well in presenting a performance of comedy and near tragedy in which all ended well, and the credits were brought to justice by Yarbrough, the green country kid, made a hit with his smart dumbness, while John Williams, the detective, was the hero of the closing scene.

The between-the-acts features added a great deal to the evening's entertainment. The first was an instrumental sextette, with Kennett Lawrence, Dorothy Yarbrough, Donna Dunn, Bobby Kline, George Holbrook and Bob Bailey giving a good presentation of "Mexicana."

The second was a vocal sextette composed of Ann Hawkins, Yvonne Kern, Mary Jane Dunn, Donna Dunn, Geraldine Holcomb and Dorothy Hardenbrook, who captured the hearts of the audience and were compelled to return for an encore. Margaret Smith, at the piano, accompanied both groups.

The Liberty theatre was filled downstairs with a large portion of the gallery seats occupied and the crowd thoroughly enjoyed the hour and a half of entertainment.

Oct. Unemployment Less Than In Sept.

Sixty-four per cent of the 3985 placements reported by the Oregon employment service during October were in private industry, compilation by the state unemployment compensation commission disclosed.

The October total was 18 per cent lower than that for September. Women got 18 per cent of the jobs and ten per cent of the men placed were veterans.

Public construction absorbed 32 per cent of those returning to work; agriculture, 20 per cent; personal service, 10 per cent; food manufacturing, 9 per cent; and private construction, 6 per cent. Lumber construction dropped out of the first five industries for the first time in many months. Public construction showed a gain of six per cent over September.

Marafield, covering Coos and Curry counties, accounted for 60 or 1.5 per cent of the state total.

The Portland metropolitan area again led the list, with 26 per cent. Klamath Falls was second and Astoria moved into third place, ahead of Eugene and Salem.

Coos County Coal Deposits Very Large

The unmined coal reserves in Coos county run into hundreds of millions of tons, it was declared Wednesday in a bulletin released by the state department of geology and mineral industries.

The bulletin bemoaned the fact that Oregon has slipped from the list of coal producing states and that the "export of this important Oregon reserve is nil."

The state body asserted, however, that the "industry is not dead. It merely awaits intelligent examination by parties or corporations who are keenly awake to the trend of things and to the potential profit possibilities in a basic mineral resource located so advantageously on deep water transportation."

The quality of the Oregon brand of coal is up to the standard of that taken from other sections and it can be mined and transported cheaply enough to compete favorably with any type of fuel now available, it was asserted.

The department also revealed that a large deposit of silica had been discovered in the state and is now being developed.—Oregonian.
