Machines Protect America

Machines play the leading role in modern defense. Shown above are machines for soil defense and national defense. The cannon is one of a number of U. S. guns capable of long-range destruction. The earth-moving equipment at top is of a type used by many farmers in building dams and reservoirs. In 1939 farmers moved more than 11 million cubic yards of earth in performing this conservation practice, equivalent to the volume of material going into Columbia river's huge Grand Coulee dam.
