Dan W. Brown Talks For Legion

Coquille Post No. 36 and the Legion Auxiliary held a joint meeting Monday evennig to hear Dan W. Brown, ninister of the Church of Christ, whose subject was, "We Build." He compared the Legion organization with the United States, stressing for both the necessity for unity and cooperation; the substitution of We for I in the general scheme.

The safety and future existence of the United States depends upon the attitude we take; our job is to make the future secure for the coming generation; if they fail to carry on and come through with the sacred ideas and traditions, it will be our fault, not theirs. The future of any generation depends upon the cooperation, the unity and thoughtful attitude of the generation preceding. To build means to go further than to dream over a set of plans; the ideas set forth in the plans must be vitalized into an actuality; a material creation of the ideas set forth. A singular thought -that the thinking and teaching in our public institutions of learning can be completely changed within a period of ten years. That may seem fantastic but is not at all impossible when one considers the rapid changes in the material and social world withyears ago were never dreamed of which we would hardly have let ourselves think about, are now appearing upon the horizon. The effect these changes will have upon the future of this our beloved America will depend upon the attitude we take, not the attitude the future generation takes. We will be the governing power if this our country, is to carry on the ideas of democracy set forth in our constitution-whether this is to be a land of equal opportunity for all or is to degenerate into a land of dictatorship and selfish greed.

After this interesting talk the Post and Auxiliary separated for their
