

Two Fine Talks At Rotary Session

(Continued from page one) "Schadenfrude," which means "getting enjoyment out of another's pain and misery." This is the philosophy of Hitler and the Nazis. While Hitler's successes have so far been stupendous (and the feather believes himself to be a second Napoleon and even the French emperor's superior), he has violated every known military rule, especially as to extending operation beyond the base of supplies and the colonel believes Hitler has passed the peak of his power. That Hitler's grandfather lived and died a bachelor is a statement heretofore published but is worth repeating. When he grew to power Hitler took the name of his unmarried grandmother, Heider, and changed it to Hitler. The immorality of the Nazi program which requires girls at stated intervals to consort with the Nazi soldier in his recreational hours, both soldier and girl being given definite approval by the higher authorities for each illegitimate child born, is another tremendous factor in the final overthrow of the German Nazis which will come to pass. Dean Peavey was introduced by his old friend, C. M. Howard. The former is on a speaking tour of the state for the "Keep Oregon Green" association, and he gave a wealth of facts and figures which were very interesting to those of this timbered section. He declared that nowhere else in the United States is found the warmth of fellowship and genuine friendliness that prevails on the Pacific coast. He has been connected with forestry for more than 35 years and declared that this Keep Oregon Green movement means much in perpetuating the timber industry in this, the greatest timbered state in the U. S. He said that the United States was richer in natural resources than any country of equal area in the world, that Oregon ranked at the top in the country, but that the country as a whole had been devastating its timber resources at an alarming rate. When the forestry service was set up and took over the national forests there were 160 million acres of timber land in the country. During the last 150 years that acreage has been reduced to 100 million acres, of which ten million acres is in private ownership. The two million acres of O. & C. land in this section is a portion of the federally owned timber land. It is not only the preservation from fire program that the dean was speaking about, but the policy of keeping land best suited for timber seeded for new growth. He named a six-point program which the K. O. G. association is endeavoring to carry out. 1—The state should adopt a forestry educational program. 2—Land classification should be carried out so that agriculture will not be attempted on land best suited to timber. 3—A thorough-going recreational program for Oregon. Tourists leave annually in California 150 million dollars and the tourist travel is now looking more and more to Oregon. He predicted that Oregon would soon be reaping \$100,000,000 a year from the development of its recreational facilities in forest areas. 4—The state should revise its tax laws, putting timber land on the same basis of assessment as other property. It should be taxed on a yield basis, paying when the timber is sold. 5—Legislation should be enacted so that the state's forestry department can block up timber areas for a sustained yield usage. If this is done the present lumber and timber using industries in the Coquille valley would be assured of timber which would keep those plants operating for all time to come. 6—There should be effective forest fire laws. The present law needs teeth put into it so that the thoughtless or careless smoker or camper would not unintentionally start conflagrations which destroy hundreds and thousands of acres of valuable timber. If such laws were made effective it would be possible to have forest insurance at a rate which the owner could pay. The speaker concluded his remarks with the statement that Oregon does not need "ghost towns" which exist in so many sections of the country and that the development of a sustained yield program would prevent ghost towns in Oregon. President Clarence Osika was in the chair for the Rotarians and called to the two speakers and local guests, who were present, were Commissioner Lars Peterson, of North Bend; Hap Hazard, Line Material Co. salesman from Portland; Harry Wandling, Rotarian from Alturas Calif.; Norman Vance, of Seattle; Bob Dill, Scout executive from Roseburg, and Mr. Perry, of the Keep Oregon Green Association from Salem.
