Howdy Folks:

The question of conserving rubber is still prominent in the minds of most motorists.

Several months back we were asked what system of switching tires we recommended.

The answer was DON'T SWITCH unless it is a case of getting an unbalanced tire off a front wheel, or to get better tread on the rear. At that time we explained why we felt that shifting tires actually damaged the cords and loosened the tread.

In the April issue of the Automotive News is an article on rubber conservation in which it states switching tires does more harm than good on the average car.

It stated wheel alignment and proper tire pressure at all times were the most important precautions. "Exactly what we stated in this column six months ago."

Houdini may have foreseen this article but we based our recommendations on past experience which you will appreciate when you consider Amxy and Ernie have served a total of 50 years of long hours servicing and repairing automotive equipment.

Again may we remind you to have your car lubricated and the oil changed every 500 miles or at least every two months.

Auto Liability Insurance Not Compulsory Under new law to become effective June 10, 1943. The safety responsibility act requires that any driver involved in an accident that results in injury, death or property damage must within 10 days present proof of \$11,000 worth of financial responsibility or have his driver's license and car registration cancelled. At any time afterwards his license and registration would be revoked immediately if his insurance policy, expired or his bond was cancelled. The act applies whether or not the driver was at fault, exception being allowed only in the case of a car legally parked at the time of the accident. After two years, if the driver paid no damages and no suit was brought against him, he would be permitted to drive and own a car again. Now the average citizen would rather play safe and place insurance on his or her car than to take a chance with FATE. With a law like the above in force there is not much choice. BUT IT IS NOT COMPULSORY. The cost for \$15,000 insurance is not high. From \$14.00 to \$16.25 per year—depending on the kind of Gas Ration Book you have. SEE ME FOR FULL DETAILS Fred R. From where I sit... by Joe Marsh Grandma Hoskins knows a lot about history but when we asked her where the first brewery was built in America, she wouldn't take sides. "You see," says Grandma, "wherever the colonists settled, one of the first things they thought about was food and beer. In fact, one reason why the Pilgrims landed at Plymouth Rock was because the Mayflower was running short of beer." Well, that was a new one on us, but Grandma showed it to us. —Just as it was written in the Mayflower's log. And it seems that all through our early American history beer sort of tempered the hardships and helped to make us a tolerant, moderate people. From where I sit, beer is the American drink of moderation and friendliness—kind of a symbol of our personal liberty. Joe Marsh No 58 of a Series Copyright, 1943, Brewing Industry Foundation
