**Canning season just ahead**  
This year the legion of home canners will be far larger than ever before. And with the canning season just ahead, it's none too soon to start planning now for this food conservation event.  
**Plan Your Canning Budget**  
Of course, the amount of home canning you do will depend upon the size of your family. It is just as wasteful to can too much as it is to pass up the canning season altogether. A fair allowance for the average person is 100 quarts of canned fruits and vegetables a year. This figure includes both home and commercially canned foods. Divide that 100 quarts in thirds, one-third for fruits and berries, one-third for tomatoes and tomato juice, and one-third for vegetables with a large portion in leafy and green vegetables, and you have a rough estimate of your family's needs for the year.  
This allowance doesn't include jellies, pickles, relishes and those extras that pop up the menu the year around.  
**Jars, Lids, and Glasses**  
Assemble all your jars that can be used for sealing. Some mayonnaise and peanut butter jars and other jars can be used if they take the standard size self-sealing lids. Check the mouths of the jars and discard all those with chips, cracks, or flaws, for such defects make perfect sealing impossible. If you've half gallon jars, plan to use them for tomatoes and fruits. They are too large for the proper penetration of heat for other foods.  
Glasses and jars which can't be sealed can be used for jam and sealed with paraffin.  
**Storage Space**  
No soup there's enough storage space for your canned goods before you plan too much canning, for if you haven't a place to keep them, don't can—foods will spoil! They should be stored in a dark, cool place. It is not wise to keep them in the kitchen because of the heat from cooking.  
**Shopping List and Shop Early**  
Include commercial peaches, pickling spices, paraffin, self-sealing lids and added canning jars on your preparatory shopping list, as well as anything else you may need.
