

Townsend Club No. 2

Townsend Club No. 2 met with Mrs. Stella July, on May 20, the meeting being called to order by president Alma Halter and opened with the Lord's prayer and son, "God Bless America." Four new members were taken into the club and one renewal. Mrs. Mary F. Rocco was present and

thanked the club for the wedding present she received. A letter was received from Anna Smith thanking us for the card sent her. After the business meeting, working on rugs and visiting was the order of the day. The Ladies Auxiliary voted to donate \$1.00 to the Children's Farm Home. A delicious luncheon was served by

the hostess. Members present were: Madames Elsie Hickam, Maude Brockman, Viola Liday, Mary F. Rocco, Mildred Celorie, Violet Roth, Alma Halter, Florence DeNoma, Estella July, Bertha Wilson was a visitor. Next meeting will be with Violet Roth at rear of 476 N. Heath St., on June 2 at two o'clock. A member, Mildred Miller, has gone to Klamath Falls, where George and Mary Keck, Grace

Keck and Eva Shephard see her often, and she was not present at this meeting. Press Cor. For grave markers for your loved ones, see John S. Sanders for style of marker and price. He also has cement building blocks. 541 West 8th, Coquille. Phone 123L. Old papers 5c a bunch

Out-of-Doors Stuff

by LANS LENEVE

A check up on the reports furnished by hunters to all the game commissions in the United States shows that 68,700,000 pounds of ducks and geese were bagged by hunters last duck season. No, there is no misprint in the above figures — sixty-eight million, seven hundred thousand pounds is correct!

Figuring the general poundage of ducks at three pounds per bird, it means that something like 22,900,000 of the birds were slain in a single season.

It was estimated that there some sixty million wild ducks on the wing at the start of last season, so this would leave some forty million or less of the birds left at the close of the season. A tough nesting season, or disease striking them before the opening of next season would mean a far less supply of birds for the coming season and with five million hunters pursuing them throughout the United States it would cut the ranks of the ducks to a pitiful figure. In view of these facts, it is plain to see that our wild migratory fowl are eventually headed to total extinction within the course of time.

While at the first glance it may appear that forty or sixty million ducks are certainly a lot of birds to kill off; if you look at the fact on the other hand that there are five million hunters gunning for them over a ten week period and that if each hunter secured his limit of ten for one day each week of the season, there would be few birds left at the conclusion of the season. And as we have already stated, if a tough nesting season should develop, or disease strike the birds in any one particular season, together with five million hunters gunning them the same season, the result would be terrible to anticipate.

Shorter seasons, cut bag limits and sensible legislation regarding the protection of the fast dwindling birds would help a lot—but try and get such action!

One of our readers has called the writer to task regarding our statement published several issues back in which we stated that it was our belief that cross breeds of dogs were more sturdy than pure-breds and more intelligent. Every dog owner has his own opinion on the subject no doubt, my own being based on experience over a period of many years in owning and training both bird and varmint dogs. "Bob," the dog with the human brain," as he was advertised, was conceded the most intelligent animal ever known to man. This dog was of several known breeds. The whole trouble is the fact that usually a pure-bred is more or less pampered and naturally hasn't the stamina of other dogs and especially of those more or less "on their own." To coddle a bird dog is a mistake but it is hard for any dog lover not to do so. But as we stated in the article our reader had reference to, we love 'em all, with one exception and have no respect or regard for the man who doesn't.

Coos Co. Has Shipped 475 Heifer Calves

Four hundred, seventy heifer calves have been purchased under the Dairy Animal Conservation program in this area. These animals have been distributed as follows: 180 shipped to Klamath county, 50 to Lake county, 60 to Union county, 160 to the state of Washington and Idaho. June 3, 1943, will be the last purchase day for heifer calves this season. The calves received under the program have been favorably received in the various purchase counties, which should create a demand for calves from this area. The farm-

Chrome Plants Start Delivering Ore Concentrates

Round-the-clock trucking of black sand concentrates from the Humphreys Gold Corporation concentrating plant north of Bullards started the first of this week, and a constant stream of chromic oxide ore is now pouring into the storage bins at the secondary plant of the U. S. Metals Reserve at Beaver Hill.

Although operations started only last Friday when the first materials from the lagoon were put through the specially-designed Humphreys spiral concentrating plant, production has been brought up to a point where it was assured yesterday that the delivery contract of 6,000 tons a month will be made good from the start.

Three new dump trucks have been put in commission for the haul between the lagoon and Beaver Hill and a fourth will be added within a day or so. Three sets of truck drivers are working eight-hour shifts. The 24-hour ferry service at Bullards is functioning and so far everything has been going along smoothly. Three eight-hour shifts are being inaugurated at the lagoon plant.

The big new primary concentrating plant of the Krome Corporation in the Seven Devils area farther north from Bullards is also in operation and concentrates are being trucked over the federal access road to the Beaver Hill plant.

The operations of Krome Corporation are also scheduled to go on a continuous round-the-clock basis.—Western World.

ers have received about five thousand dollars for these calves, which they normally would not have received.

Pete Swanson fancies himself as an armchair strategist. Sometimes he gets so tangled up, I just can't resist tryin' to straighten him out.

For instance, the other day he was waxing indignant about our soldiers being allowed to buy beer right in camp. Said that was just coddling the troops and would ruin discipline.

I told him the actual facts had already been established by a study the Government made. Their report said chaplains and

the military police agree that instead of ruining discipline, 3.3 beer sold in Army camps provides our soldiers with a mild form of relaxation without impairing their efficiency.

Well, Pete allowed that the chaplains and military police are a pretty good authority on what's right for soldiers. I've noticed lately he's been confining his remarks to the broader phases of strategy.
