THE COQUILLE VALLEY SENTINEL, COQUILLE, OREGON, THURSDAY, FEBRUARY 3, 1944.

Our good friend Ray McKay, of the Coos Bay district, relates the folowing story. In the past we have published many stories from readers of this column and all of them interesting and we are always glad to receive anything of interest pertain-ing to the out of doors. Mr. McKay's story is of unusual interest and we extend him our grateful thanks for same. Well, here it is; we quote:

"At one time I used to do the plowing and planting on our ranch, and in congress labored for months to being interested in Nature, I always induce war production board to recogplow, picking up the worms that were extraction plant at an elevation of unearthed. And I'm telling you that 7,500 feet in the Montana Rockies. an old crow is plenty smart. He is Not only was a complete plant innot you are carrying a gun. But my perser- attack upon Pearl Harbor and ranks vance finally won out, for one day, with the Canol oil field development as he paused too long, evidently in the Fort Norman district of Canagloating over an unusually fat, juicy da. The total investment of governworm, I made a mad dash and was ment funds is less, but the ultimate almost upon him-in fact, so close, loss may be even greater, in the that he hadn't time to pick up his opinion of those who still defend the treasure and I beat him to it. The Fort Norman adventure as supplying

### **Slaughter Of** The Innocents

Right now forest officials are trywhich go up in smoke along about Markets for new homes, amounting

In most fern patches, young Douglas-fir trees find a friendly haven until they are big enough to withstand the strong, burning sun, and stick their heads above the protecting fern cover. But in the early spring of the year, after the winter rains stop and before the ferns start growing, these dry fern patches are a dangerous tinderbox. Dry fern burns like celluloid and when fire once gets a toe-hold it rushes pell-mell on its destructive path. Fern makes a flash fire, hot enough to kill a young tree instantly, but not hot enough to kill out the deep-rooted fern.

The number of fires started accidentally can be cut down in the fern season, just as they have been greatly reduced during the regular fire season in summer time. The delib-

# 4-H Leaders To Meet Feb. 7-8

Local 4-H leaders will have the opportunity of meeting together to discuss club problems in two different meetings which will be held in the county February 7 and 8. L. J. Allen. assistant state club leader, will meet

with the groups at which time the leaders association will be organized. Suggestions on organizing and coordinating leader activities will be discussed by Mr. Allen.

For leaders in the north end of the county the meeting will be held at the North Bend city hall, Monday evening at 7:30. On Tuesday evening in the Bandon city hall at 8:00 the meeting will be held for all leaders in the south end of the county. Round table discussions will be held for both home economics and agricultural projects. Leaders will be given opportunities to report what their clubs have been doing thus far in the club year and to present any problems which they may have. All former leaders as well as any one interested in the club program are urged to attend, according to Mrs. Dorothy Bishop Dunn, home demonstration agent. Transportation will be provided by the county extension agents to the meeting at Bandon for those interested in attending on Lord as a thousand years, and a Tuesday evening. Cars will leave thousand years as one day .-- II Peter from the court house in Coquille at 7:00 oclock.

white object proved to be the handle war-time n off of a white tea cup. -0-

"While I examined it, the big, black rascal flew about the field squawking his displeasure and cussing me plenty in "crow language." So I tossed the handle back upon the ground and had only made my way a few feet, when upon outspread wings he descended and grabbed up the old handle and away he flew with it.

"He continued frequenting the field after that, but guarded his treasure so well that he would never allow me to approach near him again. Now ford the opportunity and not in one can you tell me, Lans, what he saw in that old tea-cup handle that caused him to stick with it in that manner?" Unquote.

To be perfectly frank with you, Mac, we cannot. We have known of crows picking up some bright object, flying with it a short distance and then dropping it, but never have we indeed interesting and I am sure it has proven so to the readers. And thanks again for it.
