

"Post War Agenda" Discussion by Dr. Cykler Before B.P.W.

A potluck dinner of banquet proportions, candle-lit and springlike, with many vases of yellow jonquils, preceded the program arranged by the Committee on International Relations and presented Monday night at the regular meeting of the Business and Professional Women's Club.

Dr. Edmund Cykler, speaker for the evening, was introduced by Martha Mulkey, chairman of arrangements. His subject was "Post War Agenda." That Dr. Cykler is a young man of multitude interests and varied training seemed evidenced when he stated he had recently made two public addresses, the first on the subject of gardening, the second, a discussion of music. His talk was interesting and his smooth, conversational style of delivery, together with his general conservatism was more realistic probably than might have been for the reason that Dr. Cykler has lived in Europe, has studied there, and has immediate European ancestry. His

father was born in Czechoslovakia and his mother in the village of Tyrol in Austria, where the Prince of Wales used to spend his vacation. Dr. Cykler knows well the influences at work, the untempered hatred of the enslaved nations for Germany and the problems of international organization due to congested conditions of countries in Europe. The language difference, difficulties of regrouping, because of differences in historical background, all combine toward a nationalism raised to the nth degree.

"War does funny things to people," said the speaker. "People's feelings stay very much the same in Europe, too much so," he added. "The great question arises as to how to establish law and order in the liberated countries when the people may feel they are being compelled in something against their tradition. Thinking men are withdrawing their ideas of policing the world; there is less talk now of that; they are skeptical of how that will be done."

On the subject of food and relief, the resettlement of the people and reconstruction, the speaker asked, "To avoid pestilence in Europe, how far

are we willing to go after the war is over? How long are we going to be willing to give up butter, etc.?"

"Is it possible to inflict our ideas upon people in nations where their culture dates back many centuries?" Under education for democracy, the speaker questions one probable success with this when as an example of workable democracy our own country has not presented in recent years what it might. He thinks a solution would be to get some of the Germans to institute their own democratic ideas. Otherwise they would be resentful.

Squelching racial antagonism, solving our economic problems so every one can make a living, crushing intolerance and sacrifice for ourselves are necessary if we are going to be the example.

Dr. Cykler closed by saying he had no solution for world peace. Certainly, he said, world peace that is imposed through the use of arms will never be made a lasting peace. Dr. Cykler asked for questions and further discussion followed up his talk for a short time.

The president, Florence Hallock, presided over a short business session.

Mrs. Mulkey, together with her committee, Hazel Hanna, Bertha Smith and Florence Hallock, should be congratulated for an outstanding meeting. Guests introduced or presented were Mrs. Geo. Eden, of Tonopah, Nevada; Mrs. E. L. Vinton, Portland; Mrs. Hatfield, of Riverton; J. P. Beyers and Chas. Stauff and Dr. and Mrs. Cykler, of Riverton. Members attending were: Mrs. R. B.
