FRANK TALK

to City People... about tne rarm Situation

by **Wayne Morse**

made to turn City People against Patriotic Farmers...

T've seen this program go on in Washington, D. C., and I'm seeing it go on in our own State of Oregon. It is time that the truth be told.

The New Deal is promoting the idea that the farmer is to be considered as a workman, entitled only to wages... not as the business man that he is. It takes a sizeable investment, depending on the type of farm, to provide a unit that will give a man full-time employment. Such an investment certainly justifies the farmer being considered as a business man.

OPA Incites Feeling Against Farmers

Against Farmers

I deplore the efforts on the part of the Administration offices, in particular the OPA, to create a class feeling between the city dweller and the farmer. Reports are continuously being circulated that the farmer is now receiving two and three times the amount for his crops as compared to pre-war. This is bound to build an antagonistic feeling against the farmer, because it insinuates that he is profit-sering from the war. The same agencies which have the facilities to estimate incomes also have the facilities and know about the increase in the costs of production of farm products. But not one word of this is mentioned, because it would make an entirely different story.

Says Farmers Can't Quit

There are many small business men whose sales have nearly doubled, and whose sales have nearly doubled, and yet are operating at a loss, because their costs have risen so high. But in the case of a farmer, all you hear about is the increase in sales—nothing about the increase in costs. Many a farmer has been caught between the price ceiling on farm products and the unregulated increase in farm costs. One Administration official has been heard to state: "We cannot be concerned about whether or not farmers stay in business. We feel sure that enough of them have so much invested in buildings and equipment that they cannot afford to quit even if they operate at a loss during this period. It would be cheaper for them to keep operating than quit. Our only concern can be that enough is produced."

Farm Costs Increase 3 Times Income One-Half

I'll give you an example. The gross income of the Grade A dairyman has increased about 40% including the

WAYNE MORSE

Distinguished Republican leader of Oregon who was urged by many prominent furmers to become a candidate for United States Senator.

federal subsidies he receives. Grain, hay, straw, and labor, his biggest items of cost, have doubled and in some cases tripled. Since it takes 10 to 15 years to build a good dairy herd, the dairyman can't just quit and wait until things get better. He doesn't want to quit; it his patriotic duty to stay on the job even if it bankrupts him, which has happened in many cases.

City Dwellers Will Pay Fair Price

You city dwellers want to pay a fair price for what you buy. You do not want to be overcharged, and again, you do not want anyone to be forced you do not want anyone to be forced to sell to you at below cost of production. But when city dwellers are constantly fed the information that producers are receiving two and three times as much for what they buy as previously, how can they help but feel that the farmer is unpatriotic and profiteering at a time when the farmer actually is doing one of the biggest and best, yet so far unrecognized jobs of any group.

City People and Farmers Must Cooperate

When this war is over we will need the close cooperation of the city people and the farmers. They must under-stand each other's problems and work together because the prosperity of both groups is dependent on the success of the other.
