

### Bare Facts From Bear Creek

"The Column That's Different" (By Lans Leneve)

Everett Cameron, of Bear Creek, left last week on a business trip over into eastern Oregon. He will visit the Morris Ray stock ranch over there.

Jean Haga and small son, Bobbie, returned last week from a visit with Mrs. Haga's husband, Grover, who is stationed in the armed forces down south. They were glad again to get back to Coos county's swell climate, having encountered 120 degree temperatures down south. The radical change in climate had a bad effect upon Bobbie's health.

During a recent trip to Coquille, a couple of New Dealers (yep, there are still some of them left), "hopped" all over us concerning our comments in this column regarding the screw workings of The New Deal. They pointed out the fact that we were a past New Dealer. "Past" is right. We ceased being one when the N.R.A. was established, men started leaning upon their shovels, bums were created by the tens of thousands, by placing men upon relief, crops were burned and the New Deal axe descended upon the necks of our porkers. The New Deal is like a rotten tomato, the longer it is kept, the rotter it becomes. But it appears that some people can still stand the stench.

The death of Thomas Dungey marks the passing of another good old sportsman, a good sportsman in life, as well as being a man who enjoyed outdoor recreations and fishing. Always good-natured and with a lively step that belied his advanced age, Tom Dungey was a man well worth knowing. He was a man that actually seemed to grow younger with the passing of the years. We are going to miss this old friend a lot.

After the historic old battleship Oregon was turned over to the government to be scrapped and a statewide protest was raised, the noble old ship could have been saved by a word from F. D. R. But it was junked and it is likely that not one scrap of it will ever go toward actually winning the war. The voters of this state should not forget this at the coming election.

A recent Japanese broadcast stated that in America that we had no butter, no cheese and, that we eat but once a week. It appears that the Japs over there are no doubt eating more propaganda today than they are food. But that one meal a week in America, with no butter or no cheese, might be a fine idea at that, if applied to the Japs in the relocation center.

The newspaper reports furnished the public concerning fishing conditions in various streams and especially the lower Coquille, the past two weeks, have been very misleading. At the date of this writing, we only have knowledge of two small fish being taken by sportsmen-anglers on the Coquille, in spite of the influx of anglers sent there by false reports.

The maples are starting to turn a golden hue in many districts; there is a pronounced nip to the air of early mornings, juncos have been glimpsed in the lowlands and there is every indication of an early fall. But we are making no predictions—even the weather has never been the same under The New Deal.

## FOREST FIRES BURN TIMBER —AND MANPOWER

LET'S FACE THIS FACT. 9 out of 10 man-caused forest fires are started through carelessness!

One careless flip of a lighted cigarette can be as serious as a crushing defeat on the battlefield. For fire not only destroys lumber, it "burns" up manpower at an alarming rate! Forest fires must be fought. No matter how important the job that trained fire fighters may be doing . . . no matter how limited the manpower . . . they must drop their work and fight fire!

Make it your responsibility to guard against forest fires! Warn your friends to be particularly careful of matches, cigarettes, camp fires. Remember—in these war days forest fires burn more than timber . . . they burn manpower too. Every forest fire is an enemy Victory!

**YOU ARE A FOREST FIRE WARDEN**  
Report every fire you see. A wisp of smoke is your signal to go into action. Rush to the nearest telephone and tell Central you want to report a fire. She will place you in touch with the proper authorities.
