

Bare Facts From Bear Creek

"The Column that's Different"
(By Laps Leneve)

That was quite a scare concerning the rationing of coffee which was thrown into the American public last week. There was a general rush throughout the country for grocery stores and a lot of coffee was purchased. This is, no doubt, what the large distributors figured on, for it helped empty over-crowded warehouses and made room for other shipments from Brazil to be stored.

Just every so often something like this is sprung on the public, or there's an epidemic of point raising by the O.P.A. or points are taken off one week and slapped back on the following week. But about the last straw, is the Government stepping in and grabbing off a big percentage of the shotgun shells that were put out for sportsmen. Just a case of more curbing. And we are sure that raising the points to 50 on a bottle of catsup is going to win the war much more quickly. It is all a huge joke. The New Deal is hung about the necks of the American people and the dictating as to what we must do, when we shall do it, etc., becomes a bit stronger day by day. We'll still take Dewey and freedom in preference to the New Deal. In fact, we'd choose anyone in preference to F.D.R.

Mr. and Mrs. John Sharp and family moved from Bear Creek last week. They were headed for their old home in Oklahoma. In addition to the Sharps, another passenger was included in the party. It was their pet deer, which was being taken along with special permission from Washington, D. C., game officials. It was with the deepest regret that we noted the departure of the Sharps, for during our acquaintanceship with them, we found out how nice people from Oklahoma can really be.

To date the bill on bucks in this district has fallen far short of past years and reports from various parts of the state show that the bill is lower than usual on bucks but over in the eastern part of the state the annual kill on hunters got off to a flying start and we notice, in spite of the warning by the O.P.A. concerning hunters using gas for deer hunting, that a Portland hunter "bagged" a fellow hunter over in Lake county, the second day the season opened.

The O.P.A. specifies how far a hunter may travel, it states that extra gas cannot be issued for hunting trips, that A card holders cannot pool their coupons in order to go hunting. This is merely another case of dictatorship exercised by that most august body under the New Deal.

Grover Haga, after spending a six-day furlough with his family here on "The Crick," departed last week for Maryland. Grover is in the infantry and the medal he wore attested to his marksmanship.

It looks as though Roosevelt is going to receive four votes in Coos county. We received that many letters last week "panning" us on our stand on the New Deal. Thanks, folks, for writing to me. Appreciate your reading this column, although we do not seem to agree on politics.

The rain last week caused the logging trucks, which have been operating on Sixes river and hauling to the railroad landing southwest of Powers, to switch their run back down the Sixes river and start hauling up the coast again.

The commercial fishermen on the lower Coquille made some fine catches of salmon last week. The sportsmen anglers also came in for their share of good catches in many instances. There has been an influx of the latter anglers to this stream this season.

Cranberry pickers are still in demand in this neck of the woods and it looks as though the public schools again will have to be drawn upon for pickers.

Today the present administration is spending money faster than the people can earn it; truly a fine record.

See you all next week. Remember Pearl Harbor, forget the New Deal (if you can) and vote for Dewey and freedom.
