When Your Back Hurts

And Your Strength and Energy Is Below Par
It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.
You may suffer sagging backache, rheumatic pains, headaches, dizziness, getting up sight, leg pains, swelling, sometimes frequent and scanty urination with smearing and burning is another sign that something is wrong with the kidneys or bladder.
There should be no doubt that prompt treatment is wiser than neglect. Use **Doan's Pills**. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

Mr. Lichtenberger was born at Wells, Minn., June 6, 1891, and was 53 years, four months and 19 days at passing.

He had lived in Coquille for the past two years, coming here from Wolf Creek, where he had been past master for ten years.

Interment was made in the cemetery at Wolf Creek beside his parents, who passed away several years ago.

The Misses Florence and Mattie Lichtenberger arrived in Coquille Thursday to make the arrangements.

Dairy Herd And Building Improvements For Dairymen

In a recent survey of Coos and Curry counties, it was found that a large number of dairymen could better their working conditions, improve their dairy herds and thereby increase production by a little financial aid, according to Ed Hughes, County FSA Supervisor, Room 14, Bank Bldg., Coquille. It was recommended by County FSA Committee that services to improve dairy stock, buildings and equipment be made available to all farmers unable to secure necessary credit from usual sources.

Ways in which Farm Security loans and management assistance can help meet these needs were outlined as follows:

First—to purchase purebred or high-producing cows for herd replacements and to cull out all cows producing less than 250 pounds of butterfat a year when feasible.

Second—to make needed repairs to barn, milking sheds and milk-houses as well as equipment and milking machines.

Third—loans and organization help in setting up group sire services to provide purebred or proven dairy bulls for a number of small herds where cost of a good sire is prohibitive.

Four—to provide for purchase of seed and fertilizer to develop improved pastures.

Five—to supply wells, pumps, stock water tanks, pipe and other water facilities for the dairy herd and buildings.

Detailed information on any of the services outlined may be secured from County FSA committeemen, including J. W. Corrie, Bullards; Bert Davenport, Catching Creek, Myrtle Point; Ed Detlefsen, Coquille, and Jeremiah J. Geaney, Coquille, or at the County FSA office on Monday from 9:00 to 12:00 and 12:30 to 4:00.
