"Buy Coal Now" Is Not An Advertising Campaign

The "Buy Coal Now" campaign is not a high pressure campaign to increase the sale of coal. It is an effort of co-operation on the part of coal agencies, transportation companies and war agencies of the federal government to bring a realistic picture of the coal shortage which will exist this coming winter unless consumers buy their coal now. It is an effort to warn against indifference and improvidence.

Consumers must lay in all the coal they can now because shortages of labor and transportation facilities will make it impossible for mines to meet a normal peak load demand for coal next winter.
