SECOND: That the plaintiff is the owner in fee simple of said real property, and the whole thereof.

THIRD: That none of said defendants have any interest or estate, right, title or lien upon or in said real property, or any portion thereof, paramount to the plaintiff's right, title and interest therein and thereof.

FOURTH: That said defendants, and each and all of them, and all persons claiming under, by or through them, or any of them, be forever barred, restrained and enjoined from asserting any claim whatever in or to said premises adverse to the plaintiff.

FIFTH: That plaintiff have such other and further relief as to the Court may seem equitable, including plaintiff's costs and disbursements herein laid out and expended as to any appearing defendants.

For a decree quieting title in and to the following described piece or parcel of land situated in Coos County, State of Oregon, to-wit:

Nothing Ventured... Nothing Gained

Every forward step in progress has been made through speculation. Number the modern conveniences in your home. Did they just happen or did they come about as the result of burning midnight oil, planning, perfecting, working and then working more? Did one man finance those modern conveniences

For instance, the telephone on your wall. Did Bell create the modern telephone systems?

Your radio... did DeForrest supply the enormous capital behind your radio set today?

Our railroads... did Hill, Harriman and other empire builders, have the millions it took to build the luxury railroads we travel on today?

Our steamship lines... were Grace and Dollar and others able to finance their own undertaking?

Each of them were specialists in their own line. But specialists invest brains against money.

We're not building steamships or operating railroad lines. We have no telephone systems nor radio factories. But we do have a coal mine... a mine on a 630-acre lease which expert engineers and surveys say is underlaid with in excess of 600,000 tons of recoverable sub-bituminous coal

When we started this coal operation and made it the only all-mechanized coal mine in the state of Oregon — we saw 200 tons daily as top production to meet our market. In less than one year we've hit that 200-tons daily production. And we've contracted more than 50,000 tons annually.

We can't supply our growing markets. The only way to do it is to expand our present mine, five miles south of Coos Bay, and open another mine on our property. To do this we're offering
