Purkey Furniture

When You Think of Furniture Think of Purkey

Do you think steel profits are big?

Recently in a nation-wide poll most people guessed that steel profits were about 20 cents on each dollar of sales. They said 10 — could be about right.

Actually, for the past ten years steel company profits have averaged less than 5 cents on each dollar of sales.

Although profits continue low, wages, employment and production are near record levels.

EMPLOYMENT

The number of wage earners is not far from the highest in peacetime steel history—20 per cent above the 1929 level.

WEEKLY WAGES

Weekly wages in steel industry in the third quarter of 1946 were 63% higher than in 1939.

PRODUCTION

Despite strikes earlier in the year, steel production in 1946 was headed toward a new peacetime record until the November coal strike.

STEEL COMPANY PROFITS

Average profit per dollar of sales in 1946 is lower than it was in most good prewar years.
