Washington Report . . .

By Hon. Harris Ellsworth
This is written just prior to my departure for Oregon. It will probably be printed after my departure for Oregon. It will probably be printed after I am home. The special session is ending, but the next regular session will begin immediately after the first of the year. Any unfinished business will be delayed only a couple of weeks by the adjournment.
The President called this special session to consider and act on interim emergency aid for Europe. The aid bill was passed and the appropriation made. He also asked that something be done to curb rising prices and inflation. Most of us think that portion of the special sessions call was pure politics. He lifted the weight from the shoulders of the Administration and tossed it to the Republican-controlled Congress, knowing full well, I am sure, that Congress could not complete action on two such important problems in the few short weeks of the special session. In the House, we (the Republicans) did

make an effort to adopt the first four points of his ten-point program with a promise that consideration would be given the remainder later. The effort was defeated. Not one single member of the Democratic side of the House voted for the bill.

I have lately picked up some seemingly reliable information regarding Russian development of high velocity rocket missiles. Strangely enough, this development might be the solution of the now almost forgotten mystery of the "flying saucers."

The Russians are reported to have developed a rocket having amazing speed and almost limitless distance. It is propelled by a series of explosions occurring several seconds apart. Each successive explosion shoots the missile forward at increased speed. Apparently the charges are packed separately and are held apart by metal discs. As each charge is fired, the metal disc is discharged like an empty cartridge shell is ejected from an automatic rifle. The discs are made of thin metal and possibly disintegrate in the air not long after they are ejected.

Could it be possible that the mysterious flying saucers were in fact metal discs from the tail of one of these super-speed rockets? If so, were the rockets experimental ones fired by our own scientists—or if you want to really stretch your imagination, were the discs from non-explosive rockets fired from Russian proving grounds?

This weekly letter from Washington will be resumed in January. Meanwhile, my best wishes to all for a very happy holiday season—and a cheerful New Year.

Parking studies conducted by the American Automobile association show that one parking space is needed for every 400 square feet of sales space in retail stores, according to the Oregon State Motor association.

The average passenger car in the United States travels 9,300 miles a year, while the average truck goes 11,000 miles, according to the Oregon State Motor association.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes let it their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, itching of skin, puffiness about the eyes—a feeling of nervous anxiety and loss of sleep and strength. Other signs of kidney or bladder disorder are sometimes burning, stanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by graded people the country over. Ask your neighbor!
