

Music Scheduled On Fair Program

Something entirely new in night entertainment will take place at the Coos County Fair August 20th and 21st. The Fair Association has contracted for the services of the musical unit of radio station KOIN of Portland, Oregon, headed by KOIN's Red Dunning.

The unit will consist of a full program, featuring Red's Gang, augmented by a special Circus act which is reported to be one of the finest ever produced. Red's Gang is one of the outstanding Western groups on the Pacific coast and will feature such versatile artists as: Johnny Carpenter, Emcee and singer; Walter McKinney, tenor soloist; Jeanne Aiken, violinist featuring both concert and western music; Mel Hansen, piano soloist; Red Dunning, comedy songs; Julius Walter, accordion soloist; male quartette, a sure fire hit.

Also with the show is Red Dunning's band of fourteen pieces which has appeared in many shows throughout the Northwest and is heard weekly on the radio from KOIN.

This show will be held at the Fair Grounds with the especially erected stage and background and it should prove to be one of the musical highlights of the season.

Your Community has a PLAN for Perpetual Forest Growth

One look at the map above and you have dots before your eyes. And you can easily see what a "pain-in-the-pocketbook" lumbering could be for operators in your county if they had to "jump" their operations from private land to private land by-passing the Oregon-California reversion sections. Uneconomical, expensive and not even plain horse sense!

But there is a sound plan of operation under the federal law that allows operators to utilize the timber on the reversion (black) sections. By making a "cooperative agreement" with the Bureau of Land Management and combining their own private lands

under a cooperative unit they can operate profitably and permanently.

Naturally, there is a responsibility on the part of private operators in this contract. They must agree to "log" their own private land on a "sustained yield" basis, rotation of areas according to growth, reseedling and adequate protection.

This responsibility is a vital part of the PLAN to assure your community of perpetual forest growth, of economic lumber supply security. Furthermore, this is the essence of a plan that is now in operation to protect you — your job, your business or profession.

perpetual, protective timber plan, write...
